ITEM: 2

SUBJECT: CUSTOMER SERVICES REPORT CARD 2024 - 2025

AUTHOR: CUSTOMER STRATEGY AND EXPERIENCE MANAGER

DATE: 18 JULY 2025

EXECUTIVE SUMMARY

This is a report concerning the Customer Services Report Card 2024 - 2025.

RECOMMENDATION/S

That the Customer Services Report Card 2024 - 2025 be received and the contents be noted.

RELATED PARTIES

There are no discernible related party conflicts of interest associated with this report or its recommendation.

IFUTURE THEME

A Trusted and Leading Organisation

PURPOSE OF REPORT/BACKGROUND

The purpose of this report is to provide an overview of volumes and information on Customer Services performance. The report provides commentary on service delivery data and highlights for Customer Services for the previous financial year along with high level focus areas for the coming year.

The Customer Services Report Card delivers on the Customer Experience Strategy five focus areas of Listen, Understand, Design, Communicate and Empower:

- Listen – Quality Assurance and benchmarking show active listening and improvement
- Understand – Data driven insights into customer needs
- Design – Automation in processes and technology
- Communicate – Updates to information accessible by customers and ease of access
- Empower – team led working groups and broader employee engagement

The data and statistics will play a valuable role in guiding future improvement opportunities.

LEGAL IMPLICATIONS

This report and its recommendations are consistent with the following legislative provisions:
Not Applicable

POLICY IMPLICATIONS

There are no discernible policy implications associated with this report or its recommendation.

RISK MANAGEMENT IMPLICATIONS

There are no discernible risk management implications associated with this report or its recommendation.

FINANCIAL/RESOURCE IMPLICATIONS

There are no discernible financial or resource implications associated with this report or its recommendation. Customer Services is budgeted and resourced in accordance with the Council budget and business planning process.

COMMUNITY AND OTHER CONSULTATION

The following stakeholders have been consulted for this report:

- Ben Pole, General Manager CCED
- Samantha Chandler, Manager, Libraries and Customer Services
- Lauren Woodrow, Customer Services Coordinator

CONCLUSION

The attached report is an overview of Customer Services performance for the 2024 - 2025 financial year. Statistics included in this report have been reviewed and refined to provide a simplified picture of performance using up to date and relevant customer data.

HUMAN RIGHTS IMPLICATIONS

HUMAN RIGHTS IMPACTS
RECEIVE AND NOTE REPORT
The Recommendation states that the report be received and the contents noted. The decision to receive and note the report does not limit human rights. Therefore, the decision is compatible with human rights.

Customer Services Report Card

1 July 2024 –
30 June 2025

ipswich.qld.gov.au

CUSTOMER SERVICES REPORT CARD

Ipswich City Council's Customer Strategy and Experience Section is committed to providing customer interactions that are consistent, friendly, timely and efficient. Customer Services' four customer service teams – Contact Centre, Concierge and Support, Applications and Lodgements interact with the community via multiple channels including face-to-face, phone, online and via email.

The purpose of this report is to provide an overview of the performance of the Customer Service Teams using relevant quantitative data. Qualitative data is also provided to highlight trends and insights into customer demand.

High volumes of interactions were experienced across all channels of customer contact in July 2024 – June 2025. Internal process improvements and investment in existing systems has had positive impacts on improving average call wait times, service response to emails and online service requests, as well as resulting in increased staff retention.

ACHIEVEMENTS

CONTACT CENTRE QUALITY ASSURANCE TESTING LOCAL GOVERNMENT RANKING – 3rd of 43

Customer Services Benchmarking Australia (CSBA) conduct over 12,000 independent assessments of customer experiences across various sectors, including Local Government. CSBA based this year's rankings on 1,492 assessments conducted between April 2024 and March 2025 and included calls to Ipswich City Council's Contact Centre.

Based on the three pillars of best practice customer experience – success, ease and sentiment:

Ipswich City Council's Contact Centre has achieved a milestone of securing the 3rd position out of 43 councils in a nationwide customer service ranking. This is an elevated ranking from 4th place last year.

This achievement aligns with the ongoing success of the Contact Centre's internal quality assurance. Overall quality is above the 80% benchmark set in the Contact Centre's Quality Assurance Framework.

PRIVATE CERTIFIER FINAL INSPECTION CERTIFICATES

The Lodgements team worked closely with council's Customer Experience team to achieve automation for Private Certifiers to submit their final certificates.

The online offer and subsequent automation of decision notices was realised in the 2023-2024 financial year. This year's project means that Private Certifiers can lodge building works applications from start to finish online and with reduced customer effort. Efficiencies gained has meant the Lodgements team has been better placed to deal with generalised increased workloads, as a result of city growth. The team was pivotal in making this project successful in providing feedback, testing functionality, managing the change with private certifiers and updating related resources.

STRATEGIC PROCESS IMPROVEMENT

To drive operational excellence and enhance customer experience, three of our four customer service teams have established Process Improvement Working Groups. These internal working groups – led by those doing the work on a day to day basis – are instrumental in identifying and implementing initiatives that align with our broader efficiency and service consistency goals.

Key achievements of these working groups have included:

- enhanced digital content accuracy by requesting website updates to ensure customers access timely and accurate information, reducing misinformation and repeat contacts
- operational efficiency gains by developing system guided interviews in collaboration with other business areas to reduce handle times, resulting in shorter call and face-to-face wait times
- service delivery consistency by standardising practices across channels which have improved the uniformity of customer interactions, regardless of service touchpoint.

These initiatives reflect our commitment to continuous improvement, cross-functional collaboration and delivering high quality service in a cost-effective manner.

CONTACT CENTRE OVERVIEW

At Ipswich City Council, our Contact Centre is the centre of community connection. Every day, our dedicated team engages with residents through multiple channels—phone, email, and online—to provide prompt and efficient support for council-related matters.

We pride ourselves on delivering service with care and empathy, ensuring that every interaction reflects our commitment to understanding and meeting the evolving needs of our diverse community. Whether it's answering questions, resolving issues, or guiding residents to the right services, the Contact Centre seeks to make every customer experience seamless and meaningful.

COMMENTARY

The Contact Centre experienced strong and consistent call demand across both service response and commercial waste queues from July 2024 – June 2025.

December is usually the Contact Centre's quietest month, however due to unplanned service interruptions the Contact Centre received 10,900 customer calls in the three-week period in comparison to 8,456 in December 2023.

The Contact Centre team has successfully engaged in several process improvement projects this year which have generated positive business results. Despite increased work volumes, service levels have remained comparable to the last financial year without the need to increase resources.

The average wait time for 2024-2025 was 4 minutes 50 seconds for general enquiries, compared to 4 minutes and 31 seconds in 2024, which is excellent performance considering the increase in workload of an additional 5,500 calls in the period.

Between 28 April and 30 June 2025, council used its telephony system to implement an Interactive Voice Response (IVR), redirecting Garden Organic (GO) calls to a dedicated team of Customer Service Officers. This ensured customers could quickly access support during peak periods of the GO rollout, as bins were delivered across the city. An additional 1,407 calls were received during this time (not reflected in the data tables below). The initiative was funded by the State Government's Recycling and Jobs Fund and delivered in collaboration with Ipswich Waste Services.

During ex-Cyclone Alfred, Contact Centre staff worked beyond regular business hours to ensure the community received high-quality service. Three team members were deployed to the Local Disaster Coordination Centre (LDCC) to support council's emergency response efforts. Meanwhile, the Contact Centre team managed operational complaints on behalf of the Emergency Management Team, helping to prioritise critical emergency activities and maintain efficient communication with the public.

e-Pathway requests are online requests specific to properties and animals.

The most common reasons for customers to phone council in July 2024 – June 2025 were to discuss rates, residential waste, animal management, roads/footpaths and parks maintenance. These enquiry types collectively accounted for 61 per cent of all inbound general phone enquiries.

Types of calls to main council number - general enquiries queue (07) 3810 6666 – July 2024 – June 2025.

TOP 5 TOPICS	TOTAL
Rates	21%
Residential waste	16%
Animal management	12%
Roads/footpaths and park maintenance	12%
Building and plumbing	7%

Customer Services received an additional 1,122 emails from customers in the period, compared to the previous financial year, which reflects a 7.5 per cent increase in a single year.

CONCIERGE AND SUPPORT OVERVIEW

The Concierge and Support team serves as the welcoming face of council, ensuring every visitor attending onsite meetings with council employees, the Mayor or Councillors receives a warm, professional and reassuring experience.

With a strong focus on customer care, the team expertly manages complex and sensitive enquiries, providing tailored support that reflects the diverse needs of our community. Their commitment to service excellence helps foster trust, accessibility, and a positive engagement with council.

COMMENTARY

The Concierge and Support team continues to experience increased foot traffic, which is reflective of Ipswich's rising population and the value our customers place on receiving a holistic customer service approach. Data for July 2024 - June 2025 shows that 11,544 customers received face-to-face customer service by the team, which is an increase of 3 per cent from the previous financial year.

This demand is expected to increase further due to the popularity of the Nicholas Street Precinct, and the continued value placed on face to face service delivery by customers.

The most common customer enquiries were rates and animal management for the second consecutive year. Quarterly rates cycles and annual licence and permit renewals drive notable seasonal peaks, and therefore an increased workload, which is managed successfully due to thorough forward planning and the expertise of this team.

CONCIERGE AND SUPPORT FACE-TO-FACE VOLUMES													
	Jul 2024	Aug 2024	Sep 2024	Oct 2024	Nov 2024	Dec 2024	Jan 2025	Feb 2025	Mar 2025	Apr 2025	May 2025	Jun 2025	Total
Concierge*	361	406	366	376	373	218	223	419	264	339	382	365	4,092

*Receiving of payments via mail; includes cheques and bank guarantees

APPLICATIONS OVERVIEW

The Applications team support a wide range of internal and external customer requests and their work is pivotal in sustaining the economic growth of Ipswich, in addition to providing opportunities for rate payers and their families. The team processes a range of bookings, licenses and permits on behalf of council.

COMMENTARY

All applications processed by the Applications team are submitted via email. The most common permit types processed by the team relate to council-owned park bookings that are utilised by ratepayers, visitors and businesses for commercial, community and private events.

The Applications team's main internal stakeholders are Sport and Recreation, Works and Fields Services, Safe City and Community Services. These relationships are essential in ensuring that events across our city are successful.

APPLICATIONS VOLUMES													
	Jul 2024	Aug 2024	Sep 2024	Oct 2024	Nov 2024	Dec 2024	Jan 2025	Feb 2025	Mar 2025	Apr 2025	May 2025	Jun 2025	Total
Emails/ applications	1,623	1,301	1,141	1,438	1,268	816	1,141	1,078	995	874	1,269	1,336	14,280
Licenses generated/ certificates issued	258	11	2	19	25	16	5	2	10	1,092	838	818	3,096

LODGEMENTS OVERVIEW

The Lodgements team specialises in providing application and lodgement advice regarding a range of planning and development applications to external customers via phone and email. The team must meet strict legislative timeframes when lodging and processing a range of building, plumbing, development and operational works applications.

COMMENTARY

Lodgements processed by this team are submitted via email and e-Pathway. The automation of final certificates in October 2024, a project initiated through the CX Program of work, generated efficiencies and improved customer experience for Private Certifiers.

The team is responsible for managing one of council's incoming call queues used to answer our customer's planning and development enquiries.

Due to the implementation of the New Planning Scheme, the team experienced its highest call volumes ever in June 2025.

LODGEMENTS VOLUMES													
	Jul 2024	Aug 2024	Sep 2024	Oct 2024	Nov 2024	Dec 2024	Jan 2025	Feb 2025	Mar 2025	Apr 2025	May 2025	Jun 2025	Total
Online applications	823	622	670	725	670	575	512	650	638	665	726	829	8,105
Emails and emailed applications	4,564	4,098	3,477	4,182	4,356	3,379	3,231	3,942	3,701	3,315	4,014	4,417	46,676
Calls (07) 3810 6888	411	440	367	364	351	266	343	356	291	339	378	505	4,411

The lodgements team experienced an approximate 14% increase in online applications and a 23.5% increase in calls received from customers in the financial year. There was also a reduction in emails and emailed applications. This indicates that while workloads are increasing, the investment into strategic process improvement is realising benefits.

FORWARD FOCUS JULY 2025 – JUNE 2026

Delivering Exceptional Customer Experiences

Focused efforts during peak periods, such as the end of calendar and financial year, including using tools to accurately forecast and manage peak workloads to ensure seamless and high-quality service delivery.

Implementing a Knowledge Management System

Deployment of a Contact Centre Knowledge Management System to empower customer service staff with easy access to accurate information, enhancing responsiveness and service quality.

Investing in Staff Development

Commitment to learning and development through structured career pathways, aimed at retaining talent and fostering an engaged, skilled workforce.

Collaborating with the CX Program of Work

Continued partnership with the Customer Experience Program, including the initiation of several high-profile Customer Journey Service Design projects and the rollout of the Knowledge Management System.

ITEM: 3

SUBJECT: INDIGENOUS ACCORD OUTCOMES REPORT 2020 - 2025

AUTHOR: COMMUNITY AND SPORT MANAGER

DATE: 19 AUGUST 2025

EXECUTIVE SUMMARY

This is a report concerning the status of the Indigenous Accord 2020 - 2025 and highlights key achievements to date as detailed in the attached outcomes report.

RECOMMENDATION/S

That the report concerning the status of the Indigenous Accord 2020 - 2025 be received and the contents noted.

RELATED PARTIES

There are no discernible conflicts of interest arising as a result of this report and its recommendation.

IFUTURE THEME

Safe, Inclusive and Creative

PURPOSE OF REPORT/BACKGROUND

In 1995, Ipswich City Council, supported by community leaders, launched a Reconciliation Initiative that led to the Indigenous Australian Accord Working Party. This resulted in the 1995 Accord, guiding collaboration with Aboriginal and Torres Strait Islander communities. The initiative won the Australian Reconciliation Award in 1997 and was formally adopted by Council in 1998.

Building on the foundations laid by the 1995 Accord (and the subsequent 2015–2018 Accord) and in 2020 Council in partnership with the IAWG, developed and adopted the Indigenous Accord 2020-2025 (The Accord). The Accord established a strategic framework for reconciliation and community governance with Aboriginal and Torres Strait Islander Peoples. It has guided Council's operations, engagement, and partnerships through targeted actions that promote collaboration, cultural recognition, and inclusive leadership.

Several actions outlined in the Accord have been successfully embedded into Council's business as usual practices. While these ongoing practices are not individually listed in the outcomes report (attached) it does provide a structured overview of the Accords key themes and outcomes showcasing selected highlights and achievements delivered across the organisation.

Some of the most significant achievements from 2020 to 2025 include:

- **Naming of Tulumur Place and Incorporation of Cultural Artwork and Iconography:**
The naming of the new civic space in Nicholas Street as 'Tulumur Place' serves as a prominent and permanent acknowledgment of First Nations culture within the heart of Ipswich.
- **Establishment and Achievements of the Aboriginal and Torres Strait Islander Employee Working Group (ATSIEWG)**
The launch of the ATSIEWG in March 2022 is notable because it establishes an internal working group within the Council specifically dedicated to ensuring a culturally safe and supportive workplace for Aboriginal and Torres Strait Islander employees.
- **The Aboriginal and Torres Strait Islander Community Engagement Guide**
The endorsement of The Aboriginal and Torres Strait Islander Community Engagement Guide by Council in December 2024 is highly significant as it provides a strategic framework for respectful and culturally appropriate engagement.
- **Launch of the Cultural Mentoring Program:**
The launch of the Cultural Mentoring Program in 2025 is aimed at increasing the number of Aboriginal and Torres Strait Islander employees and providing pathways for career and skill development at Council. In addition to recruitment, the program is designed to support long-term retention by fostering a culturally safe and inclusive workplace, strengthening professional networks and offering ongoing mentorship and development opportunities.
- **Improved Community Awareness and Economic Independence for Indigenous Businesses**
Through various platforms such as the First Nations Industry Yarns, Black Coffee network meetings, Murri Interagency, and NAIDOC Family and Cultural Celebrations multiple Indigenous businesses have been showcased to the broader community.

While not every action in the 2020–2025 Accord has been completed to date and some outside Council's direct responsibilities, the Accord will provide a strong platform for continued progress. Council has played a key role in driving change, uniting the organisation around shared reconciliation goals, and fostering collaboration across diverse sectors of the community.

LEGAL IMPLICATIONS

This report and its recommendations are consistent with the following legislative provisions:
Not Applicable

POLICY IMPLICATIONS

Indigenous Accord Policy

RISK MANAGEMENT IMPLICATIONS

Based on the general nature of this report it is deemed that there are no risks associated with the recommendation.

FINANCIAL/RESOURCE IMPLICATIONS

The various council departments have aligned their budgets to achieve the desired outcomes identified in the Indigenous Accord 2020 -2025. The Community and Sport Operational Budget has allocated \$30,000 towards engagement and project activities for the development of the next iteration .

COMMUNITY AND OTHER CONSULTATION

- Manager, Community and Cultural Services
- Indigenous Community Development Officer
- Native Title and Cultural Heritage Officer
- Environmental Advisory Team Lead
- Community Research and Engagement Manager

CONCLUSION

The 2020–2025 Accord outcomes report highlights Council’s key achievements in advancing reconciliation, including cultural recognition, inclusive workplace initiatives, strategic engagement frameworks, and support for Indigenous businesses, laying a strong foundation for continued progress into the next iteration.

Council officers will commence planning for the next Accord, drawing on the insights and experiences of the past five years. This new iteration will capture both the achievements to date and the aspirations still to be realised with completion planned for adoption before July 2026.

Indigenous Accord Outcomes Report

2020 – 2025

Version 1

Draft

ACKNOWLEDGEMENT OF COUNTRY

Ipswich City Council respectfully acknowledges the Traditional Owners, the Jagera, Yuggera and Ugarapul peoples of the Yugara/Yagara Language Group, as custodians of the land and waters we share. We pay our respects to their Elders past, present and emerging, as the keepers of the traditions, customs, cultures and stories of proud people.

Building on the foundations laid by the 1995 Accord (and the subsequent 2015–2018 Accord), in 2020 Ipswich City Council (Council) in collaboration with the Indigenous Accord Working Group, developed and adopted the Indigenous Accord 2020-2025 (the Accord), which is the strategic framework for reconciliation and community governance with Aboriginal and Torres Strait Islander Peoples. It has guided Council's engagement, operations, and partnerships through targeted actions that promote collaboration, cultural recognition, and inclusive leadership.

The achievements outlined in this report are the result of contributions from across Council. Every department has played a vital role in advancing the goals of the Accord whether through direct initiatives or by embedding culturally inclusive practices into everyday operations. While this report highlights many key outcomes it does not capture every initiative. Many more have been inspired by the Accord and reflect the organisation's shared and ongoing commitment to reconciliation.

Overview of the Accord

The following figure provides an overview of the 7 themes outlined within the Accord. Each theme begins with a preamble and then details the outcomes, actions, timeframes, and responsibilities under each theme.

Figure 1: Themes of the Accord

Council is committed to meaningful, respectful, and culturally appropriate engagement with the Traditional Owners and the Aboriginal and Torres Strait Islander communities in Ipswich.

Outcome Achievements 2020 -2025

Since 2020 Council has strengthened its commitment to reconciliation, cultural inclusion, and respect. Throughout this report we have highlighted how Aboriginal and Torres Strait Islander perspectives have been meaningfully embedded across Council’s operations, public spaces, and community engagement. These achievements are not isolated milestones and they reflect a sustained and strategic effort that has led to widespread change across the organisation.

Many initiatives from the Accord have evolved into embedded practices, shaping Council’s culture, policies, and community relationships in lasting and impactful ways.

Some of the most significant achievements from 2020 to 2025 include:

- **Naming of Tulumur Place and Incorporation of Cultural Artwork and Iconography:**
The naming of the new civic space in Nicholas Street as ‘Tulumur Place’ serves as a prominent and permanent acknowledgment of First Nations culture within the heart of Ipswich.
- **Establishment and Achievements of the Aboriginal and Torres Strait Islander Employee Working Group (ATSIEWG)**
The launch of the ATSIEWG in March 2022 is notable because it establishes an internal working group within the Council specifically dedicated to ensuring a culturally safe and supportive workplace for Aboriginal and Torres Strait Islander employees.
- **The Aboriginal and Torres Strait Islander Community Engagement Guide**
The endorsement of The Aboriginal and Torres Strait Islander Community Engagement Guide by Council in December 2024 is highly significant as it provides a strategic framework for respectful and culturally appropriate engagement.
- **Launch of the Cultural Mentoring Program:**
The launch of the Cultural Mentoring Program in 2025 is aimed at increasing the number of Aboriginal and Torres Strait Islander employees and providing pathways for career and skill development at Council. In addition to recruitment, the program is designed to support long-term retention by fostering a culturally safe and inclusive workplace, strengthening professional networks and offering ongoing mentorship and development opportunities.
- **Improved Community Awareness and Economic Independence for Indigenous Businesses**
Through various platforms such as the First Nations Industry Yarns, Black Coffee network meetings, Murri Interagency, and NAIDOC Family and Cultural Celebrations multiple Indigenous businesses have been showcased to the broader community.

Several actions outlined in the Accord have been successfully embedded into Council’s business as usual practices. While these ongoing practices are not individually listed, the following tables provide a structured overview of the Accords key themes and outcomes, showcasing selected highlights and achievements delivered across the organisation.

THEME 1: CULTURAL RECOGNITION, RESPECT AND COMMUNITY ENGAGEMENT

This Accord acknowledges the importance for Ipswich City Council to recognise the Aboriginal and Torres Strait Islander peoples and communities of Ipswich. This Accord provides that council and Aboriginal and Torres Strait Islander peoples work together for the purpose of mutual respect and to positively, respectfully and proactively recognise, include and engage with the community.

Outcome	2020 – 2025 Highlights
1.1: Representation of Aboriginal and Torres Strait Islander communities and people on council premises and properties	<ul style="list-style-type: none"> Naming of Tulumur Place: A significant milestone in cultural recognition was the naming of the new civic space in Nicholas Street as 'Tulumur Place'. Incorporation of Artwork and Iconography: Aboriginal and Torres Strait artwork and cultural heritage iconography is integrated into Ipswich's spaces and facilities, including the CBD and 1 Nicholas Street. This includes "culturally patterned wallpaper and furniture" based on Indigenous Community Consultation. Installation of the cultural totem poles in locations around Ipswich that have cultural significance to the Traditional Owners (eg. Hardings Paddock, Denmark Hill, Spearlily Park, Colleges Crossing).
1.2: Symbolic and public recognition of the 2007 Apology to Indigenous Peoples of Australia and public commemoration of 'Sorry Day'	<ul style="list-style-type: none"> Ipswich City Council continues to fly the flags at half-mast to acknowledge Sorry Day.
1.3: The history of Aboriginal and Torres Strait Islander peoples in Ipswich is publicly documented	<ul style="list-style-type: none"> Notice of Motion - Truth-telling and Healing Inquiry - moved by Cr Tully at Council Ordinary Meeting 12.12.24 outlined that in recognition of the Ipswich City Council 2020-2025 Indigenous Accord, Ipswich City Council calls on the Queensland Government to restore the "Truth-telling and Healing Inquiry" which was disbanded on 28 November 2024 following the repeal of the Path to Treaty Act 2023 which was originally supported on 10 May 2023 without dissent of the 93 members of the Queensland Parliament and That, Council offer a repository for truth-telling stories based on verbal, written and electronic submissions for co-ordination and preservation through Ipswich Libraries.
1.4: Recognise Aboriginal and Torres Strait Islander service men and women and Indigenous peoples who have lost their lives in various conflicts throughout history, including the Australian Frontier Wars	<ul style="list-style-type: none"> The development of an Aboriginal and Torres Strait Islander War Memorial in Queens Park evolved into two projects: <ol style="list-style-type: none"> The addition of a 9th plinth in recognition of First Nations People was added to the original eight plinth RSL memorial proposal at the Ipswich RSL Memorial Gardens. "This Memorial is in commemoration and recognition of those Aboriginal and Torres Strait Islander Men and Women who served in all wars and those who paid the ultimate Sacrifice". , and, The "Queens Park Ceremonial, Healing and Remembrance Place." The tender evaluation has been completed, and a preferred supplier has been selected. Procurement is currently going through the contract award process. Works are due to commence before the end of this financial year, completion by September 2025.
1.5: Council-owned libraries and the Art Gallery are culturally safe and welcoming places for Aboriginal and Torres Strait Islander people, their	<ul style="list-style-type: none"> Ipswich Central Library and Ipswich Children's Library have incorporated "culturally appropriate and inclusive design elements" to create culturally safe and welcoming spaces.

families, children, young people and Elders	<ul style="list-style-type: none"> Completed feature walls have culturally patterned wallpaper and furniture (as per the Indigenous Community consultation report by Black Drum). Ipswich Libraries embed First Nations culture through inclusive programs, storytelling, outdoor reading trails, community events, and partnerships, with Acknowledgement to Country and Indigenous-authored stories featured across all children's and family initiatives. Ipswich brings its commitments to life through diverse programming and exhibitions. Events like Spark Ipswich's <i>deLight</i> illuminate public spaces with First Nations artwork, while exhibitions such as <i>Strong Roots Rising</i> and <i>I, object</i> explore identity, heritage, and Indigenous relationships with cultural objects. An increase of celebrating First Nations storytelling, history, and contemporary art is notable with these initiatives fostering connection, harmony, and leadership within the Aboriginal and Torres Strait Islander communities.
1.6: Council continues to provide and support celebrations and healing ceremonies in partnership with community organisations, government agencies and the private sector to ensure ongoing community leadership is developed	<ul style="list-style-type: none"> People and Culture Branch implemented the Days of Celebration Annual Calendar that has listed the following significant days of importance: International Day of the Worlds Indigenous People; National Sorry Day; Reconciliation Week; NAIDOC Week; National Apology Day; National Aboriginal and Torres Strait Islander Children's Day. Council has supported a range of community initiatives such as NAIDOC, Indigenous Children's Day, Reconciliation Week activities, Sorry Day activities. (2020 – 2025) Spark Ipswich, Galvanised - A Festival of Heritage held the Culture on Country (Harding's Paddock) in 2023 and the Wild Foods Festival in 2024.
1.7: Council continues to support and increase opportunities for Aboriginal and Torres Strait Islander peoples usage and engagement with the Briggs Road Sports Club	<ul style="list-style-type: none"> Council continues to work alongside Kambu Progress Association and will commence negotiations this calendar year at the view of entering a new lease.
1.8: Elected representatives meaningfully engage with local Aboriginal and Torres Strait Islander community	<ul style="list-style-type: none"> Council adopted The Aboriginal and Torres Strait Islander Community Engagement Guide in December 2024. The formation of the Representative Engagement Groups will now see further opportunities for elected representatives to engage meaningfully with community.
1.9: Enhanced understanding and protection of Aboriginal and Torres Strait Islander intellectual property and copyright	<ul style="list-style-type: none"> Council connected intellectual property and copyright subject matter experts with community to raise awareness of protecting Aboriginal and Torres Strait Islander intellectual property and copyright. This has resulted in positive engagements and learnings.
1.10 The Ipswich City Council Indigenous Accord Working Group continues to collaborate and work with council throughout the implementation of the 2020–2025 Accord	<ul style="list-style-type: none"> Indigenous Accord Working Group has played a significant role in shaping and advancing the development of the Accord. Through both formal contributions and informal advocacy, the group has been instrumental in driving positive outcomes across the city and fostering meaningful engagement with Aboriginal and Torres Strait Islander communities.

THEME 2: TRADITIONAL OWNERS

This theme recognises Traditional Owners as custodians of the land with connection to country for tens of thousands of years, acknowledging their rights to be central stakeholders in decision-making about Ipswich's lands, regions, places, and natural resources.

Outcome	2020 – 2025 Highlights
2.1: Council has an ongoing, productive, and meaningful working relationship with Traditional Owners via a representative steering committee	<ul style="list-style-type: none"> The Aboriginal and Torres Strait Islander Community Engagement Guide was endorsed by Council in December 2024. Discussions on how to coordinate the next steps for forming the Representative Engagement Groups (incl. Traditional Owner Representative Steering Committee) have progressed.
2.2 Council has an ongoing, productive and meaningful working relationship with the registered Native Title Party.	<ul style="list-style-type: none"> Council has developed internal working documents as per Councils legislative requirements, which also ensures this action item is actioned. Namely, Native Title (future acts) and Cultural Heritage Administrative Directive; the Native Title (future acts) Compliance Procedure and the Cultural Heritage Clearance Procedure. Council is currently in the processes of finalising a Cultural Heritage Management Plan for White Rock Spring Mountain Conversation Estate Stage 1 works with the registered Native Title Party for YUP QUD213/2017.
2.3: Meaningful engagement and dialogue between land developers and Traditional Owners	<ul style="list-style-type: none"> The Aboriginal and Torres Strait Islander Community Engagement Guide is on council's website available for external organisations for direction on culturally responsive engagement Council has been working in a coordinated effort to ensure this outcome is actioned, eg. Stockland Botanica Pedestrian Bridge Project. There has been an inclusion of a standard advice for all major development applications to ensure proactive engagement between land developers and the T.O's.
2.4: Elected representatives and council staff undertake Cultural Awareness/Capability Training	<ul style="list-style-type: none"> The first stage of the Cultural Awareness Training program launched with the roll out of the SBS First Nations modules in July 2023. These modules provide the foundational knowledge and understanding of Aboriginal and Torres Strait Islander cultures as it applies to the workplace.
2.5: Council implements policies and cultural protocols with guidance from the Traditional Owner Representative Steering Committee	<ul style="list-style-type: none"> Ceremonies, Protocols and Cultural Awareness have been included in the Aboriginal and Torres Strait Islander Community Engagement Guide (direct outcome of the Community Engagement process). Council has begun investigations and early planning into the Employment of Indigenous Ranges. Council has provided letters of support to several Traditional Owner organisations to support grant applications for Indigenous Ranger Programs.
2.6: Council works collaboratively with the Traditional Owner Representative Steering Committee to develop a capacity building framework to assist Traditional Owners with their skill development	<ul style="list-style-type: none"> The Aboriginal and Torres Strait Islander Community Engagement Guide was endorsed by Council in December 2024. Discussions on how to coordinate the next steps for forming the Traditional Owner Representative Steering Committee have progressed. In the interim programs like First Nation Industry Yarns, initiated in 2023 has highlighted the cultural knowledge, skill gaps and experience faced by First Nation businesses and employees working on country. Over 150 community leaders have attended since inception.

Item 3 / Attachment 1.

2.7: Council explores funding and partnership opportunities regarding the establishment of an Indigenous Cultural Centre	<ul style="list-style-type: none"> The need for a cultural centre is consistently raised during engagement on other First Nations projects, such as the Queens Park Ceremonial, Healing and Remembrance Place, and the draft Engagement Guide. Progress to date has been limited without the establishment of Representative Engagement Groups.
--	--

THEME 3: EDUCATION, EMPLOYMENT AND SKILLS DEVELOPMENT

This theme emphasises education, employment, and skills development to enhance opportunities for Aboriginal and Torres Strait Islander peoples, aiming to establish Ipswich City Council as a leading employer of Indigenous people.

Outcome	2020 – 2025 Highlights
3.1: Increase the number of Aboriginal and Torres Strait Islander employees at Ipswich City Council and provide pathways for career and skill development	<ul style="list-style-type: none"> In 2025, Council launched the Cultural Mentoring Program to support new Aboriginal and Torres Strait Islander employees, trainees, and work experience students. The program provides a welcoming environment where cultural mentors offer guidance and encouragement, helping ease the transition into the workplace and supporting long-term career success and retention at Council.
3.2: Aboriginal and Torres Strait Islander employees of council are supported through culturally appropriate human resource processes	<ul style="list-style-type: none"> Launched in March 2022, the Aboriginal and Torres Strait Islander Employee Working Group (ATSIEWG) provides advice to Council on ensuring a culturally safe and supportive workplace for Aboriginal and Torres Strait Islander employees Key initiatives supported by the ATSIEWG include: <ul style="list-style-type: none"> Providing advice and support across Council on Indigenous Accord 2020–2025 action items and initiatives Adding an Acknowledgment of Country to Council email signature blocks, featuring the Indigenous Accord digital symbol Incorporating the Accord symbol and Bradley Eliot’s Indigenous artwork on resource recovery trucks Introducing non-compulsory Indigenous Accord polo shirts for staff Including the Indigenous ‘Wunya’ hi-vis shirt as an option in the compulsory uniform Supporting the launch of Council’s Indigenous Mentoring Program Promoting cultural awareness training across Council The ATSIEWG has provided council with an internal stakeholder representative voice for the consultation on the Aboriginal and Torres Strait Islander Community Engagement Guide, traineeship intake and the Queens Park Ceremonial, Healing and Remembrance Place. An introduction of paid cultural, ceremonial and NAIDOC leave for all Aboriginal and Torres Strait Islander staff as part of employee leave entitlements. 10 paid days per calendar year may be accessed by Aboriginal and/or Torres Strait Islander employees for the purposes of attending to cultural obligations and activities outside the workplace. An additional 5 unpaid days per calendar year is also made available.

Item 3 / Attachment 1.

3.3: Implement and support targeted programs to increase work experience, traineeship and internship opportunities for Aboriginal and Torres Strait Islander peoples	<ul style="list-style-type: none"> Aboriginal and Torres Strait Islander Employee Working Group joined with the Vocational Pathways Coordinator to support the recruitment of Traineeships and were an essential element of the hiring panels and candidate workshops. This partnership led to a higher rate of applicants who identify as Aboriginal and Torres Strait Islander than ever before.
3.4: Support initiatives that improve cultural understanding and the importance of early years learning	<ul style="list-style-type: none"> Councils have supported numerous early learning centres to connect to culture, build strong cultural understanding and identity across Ipswich. Council also offers a range of programming dedicated to early years (libraries, art gallery, community centres etc).
3.5: Improved school attendance and further education opportunities for Aboriginal and Torres Strait Islander students	<ul style="list-style-type: none"> Council have supported a number of new education facilities to ensure they are culturally safe for students. These facilities include Bellbird Park State School, Ripley Valley State School and Collingwood Park State School. Schools have implemented a range of initiatives such as yarning circles, cultural artwork, dedicated staffing resources.
3.6: Improved collaboration and information sharing between local government entities about best practice models for working and engaging with Aboriginal and Torres Strait Islander peoples	<ul style="list-style-type: none"> The Aboriginal and Torres Strait Islander Community Engagement Guide has been designed following desktop research of the other local governments engagement with Aboriginal and Torres Strait Islander peoples. Other councils have reached out to Ipswich for guidance and information sharing.

THEME 4: BUSINESS DEVELOPMENT

This theme acknowledges the important contributions of Aboriginal and Torres Strait Islander businesses and outlines mutual responsibilities for their ongoing support, encouragement, and promotion.

Outcome	2020 – 2025 Highlights
4.1: Improved empowerment and economic independence of local Aboriginal and Torres Strait Islander businesses	<ul style="list-style-type: none"> The "Ganaar Tulumur Project" was established to review internal processes with the aim of increasing the engagement of First Nations-owned businesses. Meetings have been held with Indigenous Businesses. Attendance at the Indigenous Business Connect Expo was also undertaken to better understand the restrictions, issues and hurdles Indigenous Businesses face with their net working capital and internal discussions have been held on how to address these. Ipswich Civic Centre, Studio 188, and Firestation 101 present the <i>First Nations on Stage</i> series, featuring a minimum of four annual performances by First Nations artists. The program includes culturally rich events such as <i>From Campfire to Stage Light</i>, <i>Waru</i>, and <i>Bangarra</i>, alongside curated programming that spans music, theatre, and film. Schools are actively engaged through education kits and outreach opportunities, linking performances to curriculum outcomes. Accessibility is supported through discounted tickets for First Nations communities and schools, fostering inclusive cultural participation across Ipswich.
4.2: Improved community awareness of local Indigenous businesses	<ul style="list-style-type: none"> The First Nations Industry Yarns, Black Coffee, Murri Interagency and NAIDOC Family and Cultural Celebrations have showcased multiple businesses to the broader community. These efforts have resulted in a notable increase in new business start-ups and

Item 3 / Attachment 1.

	<p>enhanced peer-to-peer support within the Indigenous business community.</p> <ul style="list-style-type: none"> • Council in partnership with DESBT (Indigenous Connect) and DATSIP (First Nations Partnerships) co-delivered the First Nations Business and Employment Showcase. This event was an opportunity for members of the community to source employment / education and local Indigenous supply information. • SPARK Ipswich coincided with the July NAIDOC week. This festival showcases and celebrates the arts and culture of Ipswich, proudly featuring the outstanding works and achievements of many First Nation's artists.
--	--

THEME 5: HOUSING

This theme acknowledges the significant challenges faced by Aboriginal and Torres Strait Islander peoples in health and wellbeing, outlining mutual responsibilities to ensure the health and wellbeing of people, places, communities, and families.

Outcome	2020 – 2025 Highlights
5.1: Improved understanding, awareness and collaboration between housing service providers	<ul style="list-style-type: none"> • The Murri Interagency has engaged the Department of Housing and other housing services to attend meetings frequently to improve housing outcomes for Aboriginal and Torres Strait Islander peoples.
5.2: Improved sustainable housing for Aboriginal and Torres Strait Islander peoples	<ul style="list-style-type: none"> • The Ipswich Local Housing Action Plan (LHAP), developed in response to the State's Housing and Homelessness Action Plan 2021–2025, outlines priority actions to address housing needs in the region. Including improved housing outcomes for First Nations peoples.

THEME 6: HEALTH AND WELLBEING

This theme acknowledges the significant challenges faced by Aboriginal and Torres Strait Islander peoples in health and wellbeing, outlining mutual responsibilities to ensure the health and wellbeing of people, places, communities, and families.

Outcome	2020 – 2025 Highlights
6.1: Improved understanding, awareness and collaboration between service providers, government entities and the business community	<ul style="list-style-type: none"> • NAIDOC expands its reach to include a diverse range of service providers, government entities and businesses. Since 2020, Over 10,000 people have attended and celebrated this day. • The Murri Interagency Meetings continues to meet monthly to cross collaborate and share localised information.
6.2: Increased awareness and action towards combatting lateral and community violence	<ul style="list-style-type: none"> • The Swich Speaks Out Domestic and Family Violence Summit is held in collaboration with the Ipswich Integrated Service System Working Group each year to share evidence-based practice and inspiration for responding to domestic and family violence in our community. Since its launch over 400 community leaders have attended.
6.3: Increased opportunities to participate in health and wellbeing initiatives	<ul style="list-style-type: none"> • Implemented locally the deadly thinking workshops / mental health training supporting agencies working with First Nation young people and adults understanding the signs suicide and impacts of suicide.

THEME 7: COMMUNITY SAFETY

This theme recognises the fundamental rights of Aboriginal and Torres Strait Islander peoples to feel and live safely, outlining mutual responsibilities to ensure the safety and security of shared places, spaces, organisations, and communities.

Outcome	2020 – 2025 Highlights
7.1: Meaningful engagement with Aboriginal and Torres Strait Islander community leaders and key stakeholders	<ul style="list-style-type: none"> Collaboration with key stakeholders like the Queensland Police Service Liaison Officers and direct engagement with Indigenous communities to ensure community safety measures are culturally appropriate and communication is relevant and informed as best practice.
7.2: Increased engagement with the Aboriginal and Torres Strait Islander communities in relation to community safety and the security of public spaces	

Next Steps 2026 Onwards

Although not all actions from the Accord have been completed, and some extended beyond Council's direct remit strong foundations have been established to support ongoing progress. Council has played a key role in advocating for change and bringing together diverse sectors of the community to advance reconciliation.

A new iteration of the Accord will be developed, building on these achievements and the lessons learned. It will continue to strengthen existing initiatives while identifying new opportunities for collaboration, innovation and growth.

Central to this process will be meaningful engagement with Aboriginal and Torres Strait Islander communities to ensure their voices shape a shared vision for the future. This vision will guide ongoing reconciliation efforts and align with the opportunities presented with the significant growth forecast for Ipswich.

The new Accord will serve as a living document reflecting both the progress made and the aspirations still to be realised.

Recognising Collaborative Efforts

The development and delivery of the Accord would not have been possible without the dedication and collaboration of the Indigenous Accord Working Group and the many sections across Council who brought the Accord to life.

Special thanks extended to the Natural Environment and Land Management Branch, Community and Cultural Services Branch, People and Culture Branch and Marketing and Promotions Branch for their ongoing efforts. Their collective championing of the Accord has helped embed reconciliation into Council's operations placing a strong foundation for the next iteration of the Accord.

3. NEXT MEETING

The next meeting to be scheduled as a tentative meeting for Thursday, 25 September 2025 at 1.00 pm.

4. GENERAL DISCUSSION (within the purpose and scope of the committee)

The Chief Executive Officer advised that in respect of 3(b) of the Terms of Reference under Roles and Responsibilities as follows; that officers can bring forward future agenda items providing updates on progress in relation to these matters:

- (b) Monitor progress of key commitments and initiatives of council, including but not limited to the:
- i. culture and diversity goals in the Ipswich Community Development Strategy;
 - ii. cultural commitments in the Ipswich 2032 Legacy Roadmap.
-

PROCEDURAL MOTIONS AND FORMAL MATTERS

The meeting commenced at 1.00 pm.

The meeting closed at 1.50 pm.

Annexure 3.1 – Multicultural Advisory Committee

This advisory committee terms of reference is an annex to the *Ipswich City Council Terms of Reference for Standing Committees Annexure 3 – Community and Sport Committee*.

1. Purpose and scope

The Multicultural Advisory Committee was established by Council on 29 May 2025 for an initial period of six months to consider matters relating to the sub activity of diversity and multiculturalism under the Core Service of Community Development and Research.

This Advisory Committee provides a council forum for discussion on council's strategy and service delivery to multicultural communities.

2. Authority

Advisory Committees operate in accordance with the *Ipswich City Council Standing Committees Terms of Reference* and the same legislative instruments and policies apply excluding Section 8.3 – Voting which will generally not be required unless deemed necessary by the Chairperson or required for a conflict declaration.

This Advisory Committee has the power only to advise and recommend a course of action to the Community and Sport Committee.

3. Role and Responsibilities

The role of the Multicultural Advisory Committee is to consider all matters within its assigned scope and formulate recommendations and advice to the Community and Sport Committee.

The Multicultural Advisory Committee will:

- a) Provide a forum to discuss matters that pertain to the work of council in supporting and engaging Ipswich's multicultural communities;
- b) Monitor progress of key commitments and initiatives of council, including but not limited to the:
 - i. culture and diversity goals in the Ipswich Community Development Strategy;
 - ii. cultural commitments in the Ipswich 2032 Legacy Roadmap: and
 - iii. Welcoming Cities Standard.
- c) Support and explore opportunities to engage and empower the Ipswich Multicultural Community Leaders Network, through Multicultural Australia as the forum facilitator;
- d) Provide a forum to receive representations from the Ipswich Multicultural Community Leaders Network including through Multicultural Australia as the network facilitator and other multicultural community leaders.

The Advisory Committee is responsible for considering matters specifically relating to the programs, resources and funding that council provides in service delivery to multicultural communities.

Matters may be referred by reports from the Chief Executive Officer (or delegated authorised officers), a referral from the Community and Sport Committee, any other Standing Committee or Council.

Invitations for stakeholders to participate or present in Advisory Committee discussions will be extended at the discretion of the Chairperson, in consultation with Committee members and must align with the Committee's purpose and scope.

This may include external representatives, such as subject matter experts, community leaders, service providers, or other relevant stakeholders depending on the topic or issue under consideration.

4. Membership

Membership of the Multicultural Advisory Committee is recommended by the Community and Sport Committee and approved by Council.

Chairperson: Councillor Pye Augustine

Deputy Chairperson: Councillor Jacob Madsen

Members:

Councillor Andrew Antonioli Councillor Marnie Doyle

Councillor David Martin

5. Meeting Frequency and Arrangements

The Multicultural Advisory Committee will meet on a schedule set by the Community and Sport Committee or as required to consider matters assigned to it.

DRAFT

Joint Regional Health Needs Assessment **Multicultural**

We acknowledge Aboriginal and Torres Strait Islander peoples as the Custodians of this land, the Jagera, Giabal and Jarowair People of the Wakka Wakka nation. We pay our respect to Elders past, present and emerging, and commit to a future with reconciliation and renewal at its heart.

Joint Regional Health Needs Assessment | Multicultural communities

Introduction

Australia is a multicultural society experiencing rapid immigration from diverse countries. The term 'multicultural' is used to describe people from culturally and linguistically diverse backgrounds, including people from refugee and asylum seeker backgrounds and those who accessed humanitarian entrant and settlement programs.

Research indicates that multicultural communities, particularly those from non-English speaking backgrounds, face health disparities, distinct health conditions, language barriers, and discrimination in health care. Their challenges include difficulty accessing interpreting services, low health literacy, concerns about cultural safety and service appropriateness, experiences of stigma and discrimination, and socio-economic and systemic factors within the Australian healthcare system¹.

Over 56,000 people in Darling Downs and West Moreton region were born in predominantly non-English speaking countries. The most common communities in our region include people from India, Philippines, Samoa, Germany, Sudan, Malaysia, Italy, Papua New Guinea, Congo, Fiji, China, and Vietnam².

We are committed to enhancing health care access and outcomes for multicultural communities. We recognise the significance of understanding the unique health needs and challenges encountered by individuals from diverse cultural backgrounds.

As partners, Darling Downs Health, West Moreton Health and Darling Downs and West Moreton PHN, we have embarked on a journey to better understand and address the unique health needs of our communities. This is one of the first Regional Health Needs Assessment reports produced jointly in collaboration between Darling Downs Health, West Moreton Health and Darling Downs and West Moreton PHN.

This *Joint Regional Health Needs Assessment: Multicultural* provides us with a baseline understanding of the needs and concerns facing this group in our community to use as the basis to enhance our healthcare planning and service provision to better support them.

This document explores patterns of health care usage, accessibility and barriers to provision of care for people who are from culturally and linguistically diverse backgrounds. We will be using this document to improve and increase our understanding about:

- primary care access for people from culturally and linguistically diverse backgrounds. This includes refugee and migrant communities.
- the efficiency and effectiveness of primary healthcare services for people from culturally and linguistically diverse background, and
- what planning, coordination, and support is required for primary healthcare services to better care for these communities.

Joint Regional Health Needs Assessment | Multicultural communities

1. Executive summary

About the joint regional Health Needs Assessments

Darling Downs and West Moreton PHN (PHN), West Moreton Health (WMH) and Darling Downs Health (DDH) partnered to develop this Joint Regional Health Needs Assessment (HNA), which represents the primary health care needs and interests of people from multicultural communities across the region, including people from refugee and asylum seeker backgrounds and those who accessed humanitarian entrant and settlement programs.

The HNA aims to identify service gaps and key issues, as well as establishing joint regional priorities.

Methodology

The HNA was completed through the implementation of an evidence-based methodology for understanding need and determining priorities. The process was conducted according to the PHN Program Needs Assessment Policy Guide³ and considered needs from multiple perspectives as outlined in Bradshaw's Taxonomy of Need⁴.

A working group and steering committee consisting of members from the PHN, WMH and DDH were established to oversee the delivery of the HNA. These groups met regularly throughout the project, with increased frequency during the project set up period.

The Darling Downs and West Moreton Region

In 2022, the total population of the Darling Downs and West Moreton region was estimated to be 606,588⁵. The region is one of the fastest growing areas in Australia and predicted to grow by 20% to 2030.

The responsibility for provision of health care and health services in the region is shared between the PHN, DDH and WMH. Aboriginal Community Controlled Health Organisations in the region include Carbal Medical Services, Cherbourg Regional Aboriginal and Islander Community Controlled Health Services (CRAICCHS), Goolburri Health Advancement Corporation, Goondir Health Services and Kambu Aboriginal and Torres Strait Islander Corporation for Health.

The region covers 99,000 km² and spans 12 local government areas (LGAs). The major communities in the region are Ipswich and Toowoomba, plus the surrounding communities located in the Lockyer Valley, Scenic Rim, Somerset, South Burnett, Cherbourg, Southern Downs, Goondiwindi and Western Downs. The region also includes communities located in the Banana Shire and Brisbane.

Joint Regional Health Needs Assessment | Multicultural communities

Multicultural communities in the Darling Downs and West Moreton Region

In 2021, 9% of people living in the region (or 53,295 people⁶) were born overseas in a non-English speaking country compared to 13% of people living in all areas of Queensland.

- A total of 5,886 people (1.1%) reported being born overseas and having poor English proficiency⁷.
- People born in a non-English speaking country living within the region were most likely born in India, the Philippines, China, Vietnam and Germany⁸.

The greatest number of people born in predominantly non-English speaking countries live in:

- Ipswich (27,517 people or 12%)
- Toowoomba (15,753 people or 9.1%)
- Lockyer Valley (3,287 or 8%)⁹.

In 2021, the main languages spoken at home by households within the region included:

- Ipswich – Samoan (1.9%), Punjabi (1%), and Vietnamese (0.9%)
- Toowoomba – Kurdish (1.1%), and Mandarin (0.7%)
- Lockyer Valley – Mandarin (1.3%)
- Western Downs – Filipino and Tagalog (0.6%, 1.1%)
- Somerset – Tagalog (0.6%, 0.7%)¹⁰.

The people who reported being born overseas and having poor English proficiency live predominantly in Ipswich (2,655 or 1.3% of those living in Ipswich), Toowoomba (2,176 or 1.3%) and Lockyer Valley (545 or 1.4%)¹¹.

Since 2000, 3,937 permanent migrants under the Humanitarian Program have settled in the region. These refugees are largely of the Yazidi and African communities who settle in Ipswich (27,517 people or 12%), Toowoomba (15,753 people or 9.1%) and the Lockyer Valley (3,287 or 8%)¹².

Health needs across the region

Multicultural consumers and stakeholders identified access to affordable health care, including access to bulk billing and the Pharmaceutical Benefits Scheme (PBS) as a key need across the region. Other health access issues identified include:

- long waiting times to access health care
- insufficient access to primary health outside of business hours
- difficulty in accessing health care close to where they live.

Joint Regional Health Needs Assessment | Multicultural communities

This underpins the following health needs identified by stakeholders, consumers and the literature:

- mental health concerns (complex trauma among refugee populations, risk factors other than trauma, stigma)
- chronic health conditions (diabetes, kidney, liver, heart and asthma)
- child development concerns (intellectual disability, trauma and brain injury)
- health system literacy (knowing what service to attend and how to book appointments)
- preventive health (vaccinations and sexual health).

Service needs

The key service need suggested by stakeholders, consumers and the literature is **better access to culturally safe and appropriate health care**. More specifically, this need includes better access to:

- culturally safe spaces, particularly for refugee communities (places that people from multicultural communities are comfortable attending)
- culturally safe and appropriate mainstream health services
- translators (in general) and with health and mental health knowledge and skills in particular
- a larger multicultural workforce (a more diverse workforce within mainstream services, more workers in multicultural communities or organisations and more female health workers where culturally appropriate)
- health care in rural and remote communities
- awareness of available health services.

Strengths and challenges

What is working well

A number of system strengths were identified by stakeholders. These included:

- community hubs in primary schools (that provide co-location and in-reach) – known and trusted places within the community where people gather
- community centres (that provide co-location and in-reach) in a trusted place where people can gather
- multicultural services and generalist services that employ health workers to meet the needs of multicultural communities
- cultural support workers who assist people to navigate the health system and link to the supports they need
- collaboration with service partners
- collaboration with community leaders
- provider networks.

What could be better

The literature, consumers and stakeholders identified a range of challenges or barriers to accessing health care.

They include:

- a lack of culturally appropriate and culturally safe health care

Joint Regional Health Needs Assessment | Multicultural communities

- the need for better access to interpreters with knowledge of health and mental health
- concerns about experiencing discrimination or racism within the healthcare system
- sociocultural values that may conflict with health behaviours and practices in the local area
- difficulties using digital health platforms
- challenges navigating a complex and fragmented health system
- social and cultural determinants of health.

The barriers stakeholders faced on the pathway to receiving health care are summarised in Figure 1.

Joint Regional Health Needs Assessment | Multicultural communities

Figure 1: Barriers on the healthcare pathway

Joint Regional Health Needs Assessment | Multicultural communities

Opportunities

To overcome some of the barriers to accessing health care as summarised in Figure 1, the following opportunities could be considered.

Health needs of refugees across the region

The refugee population is one that has been identified by stakeholders as a priority. Refugees are described as having a high level of need in both physical and mental health. Toowoomba is the primary settlement area with Ipswich (and the Lockyer Valley) providing secondary settlement in areas for predominantly the Yazidi and African communities. There is an opportunity to work collaboratively across the region to improve access to services for these communities.

Potential focus areas

The potential focus areas below are relevant to both refugee communities and multicultural communities more broadly. Stakeholders participating in the consultations were invited to a workshop and online meeting to prioritise the opportunities for the region. An overview of the priorities identified through this process is described in Table 1.

Table 1: Opportunities and relevance across the region

Opportunity	Relevance across the region
Develop education resources and provide education sessions for community leaders and community members	Relevant across the region – with a focus on the refugee populations within Ipswich and Toowoomba – stakeholders considered this a high priority across the region
Expand the existing Refugee Health Officer (RHO) positions funded at SSI and Multicultural Australia	Relevant across the region – with a focus on the refugee populations within Ipswich and Toowoomba – stakeholders considered this a high priority across the region
Identify and resource refugee-ready general practices that can complete newly arrived refugee health checks particularly in West Moreton	Relevant across the region – with a focus on the refugee populations within Ipswich and Toowoomba – stakeholders considered this a high priority across the region
Enhance access to interpreters for consumers receiving primary health	Relevant across the region – stakeholders considered this a high priority across the region
Develop community transport within the region	Relevant across the region – stakeholders considered this a high priority across the region
Build cultural competency with GPs, mainstream services, university students or volunteers with an interest in providing health care to multicultural communities	Relevant across the region – stakeholders considered this a high priority across the region
Join the Refugee Health Connect partnerships with the Mater (currently only available in Ipswich)	Relevant across the region – with a focus on the refugee populations within Ipswich and Toowoomba

Joint Regional Health Needs Assessment | Multicultural communities

Opportunity	Relevance across the region
Provide a warm handover to providers at the end of the five-year Settlement Engagement and Transition Support (SETS) program	Most relevant to providers within the Toowoomba region connecting with those in Ipswich
Increase access to mobile health services, telehealth or outreach workers	Relevant across the region
Increase the pool of community connectors/peer support workers	Relevant across the region
Identify and map multicultural health and mental health professionals within the area	Relevant across the region

Joint Regional Health Needs Assessment | Multicultural communities

2. Multicultural communities in the region

The multicultural population

Multicultural refers to the group of people other than those from Anglo-Celtic backgrounds and Aboriginal and Torres Strait Islander peoples. Australia's multicultural population includes those who have travelled to Australia on various visas, and their children and grandchildren. However, identifying people from multicultural communities in available datasets is difficult and complex – often multicultural communities are invisible in many data sets.¹³ No one indicator provides a complete picture of the number of people within multicultural communities.

A regional overview is presented in this chapter. For more details, please see 'Breakdown of population across LGAs' in Appendix 1.

People born overseas

Table 2 describes the proportion of people born overseas who live in the region, compared to those who live in Queensland overall. The region has a smaller proportion of people from multicultural communities relative to Queensland. In 2021:

- Of the people living in the region, 9% were born overseas in a non-English speaking country (compared to 13% of people living in Queensland).
- Of the people living in the region, 7% were born overseas in an English-speaking country (compared to 10% of people living in Queensland overall).

A total of 1% of people reported being born overseas and having poor English proficiency. These people live predominantly in Ipswich and Toowoomba.

Table 2: Population breakdown in the region compared with Queensland overall, 2021

Population group	DDWM		Queensland overall	
	n	Percent of total population (%)	n	Percent of total population (%)
Total population	597,763	100	5,156,138	100
People born in Australia	465,543	78	3,680,014	71
People born overseas (English speaking countries)	41,544	7	524,705	10
People born overseas (non-English speaking countries)	53,295	9	645,625	13

Joint Regional Health Needs Assessment | Multicultural communities

People speaking a language other than English at home

In 2021, 15.6% of Queensland households reported speaking a language other than English at home (291,137 people). Table 4 illustrates the percentage of people in each local government area (LGA) in the region who speak a language other than English at home (see Appendix 1. Demographic data tables for more detail).

In Ipswich, the main languages spoken at home include:

- Samoan (1.9%)
- Punjabi (1%)
- Vietnamese (0.9%).

In Toowoomba, the main languages spoken at home include:

- Kurdish Kurmanji (1.1%)
- Mandarin (0.7%).

In the Lockyer Valley, the main languages spoken at home include:

- Mandarin (1.3%).

In Western Downs and Somerset respectively, the main languages spoken at home include:

- Filipino (0.6%, 1.1%)
- Tagalog (0.6%, 0.7%).

Table 4: Language (other than English) used at home by LGA

LGA	Total number of people who speak a language other than English at home (ABS, 2021)	% of residents in the LGA (ABS, 2021)
Ipswich	12,772	16.4
Toowoomba	5,962	9.2
Lockyer Valley	1161	8.2
Southern Downs	855	6.1
Western Downs	628	5.3
South Burnett	548	4.3
Somerset*	447	6.1
Scenic Rim*	243	5.4
Goondiwindi region	178	4.7
Banana Shire*	20	6.0
Cherbourg	2	2.0

*Area partially falls within the DDWM region. Numbers adjusted to reflect the proportion that falls within the DDWM region (Scenic Rim – 29.2%; Banana Shire – 6.5%; Somerset – 80.1%. Brisbane has been excluded because Lake Manchester/England Creek is the only area within the Brisbane LGA that falls within the DDWM region, but has no residents)

Joint Regional Health Needs Assessment | Multicultural communities

Refugees from multicultural populations

Australia's Refugee and Humanitarian Program¹⁴ helps refugees and people in humanitarian need who are:

- outside Australia (offshore) and need to resettle to Australia when they do not have any other durable solutions available
- already in Australia (onshore) and who want to seek protection after arriving in Australia.

The offshore component of the Humanitarian Program prioritises humanitarian entrants and refugees of nationalities from three major regions:

- the Middle East, such as Iraq, Syria and Iran
- Asia, such as Myanmar and Afghanistan
- Africa, such as Burundi, the Democratic Republic of the Congo, Eritrea, Ethiopia, Somalia, South Sudan and Sudan.

Between 2000 and 2016, nearly 4,000 people settled in the region under the offshore humanitarian program (see Table 5). In these years, people predominantly settled in Ipswich (2,149 or 55%), Toowoomba (1,624 or 41.2%) and the Lockyer Valley (152 or 4%). Most people settle initially in Toowoomba. Toowoomba is a designated refugee and humanitarian settlement area and has been for many years. Toowoomba is also one of the areas in Queensland piloted for the Women at Risk refugee scheme. Stakeholders report that many people move from Toowoomba to Ipswich (a secondary settlement area) when their time on the resettlement program is complete, possibly for better access to work in an area that has until recently been relatively affordable. In general, refugees and humanitarian entrants are at risk of poor health outcomes due to exposure to trauma, challenges of the migration experience and barriers to accessing health care pre- and post-arrival.¹⁵

Table 5: Breakdown of permanent migrant entries under the Offshore Humanitarian Program (OHP) in the region, compared with Queensland overall, 2016

		DDWM		Queensland overall
	n	Percent of total population (%)	n	Percent of total population (%)
Total population	544,734	100	4,703,136	100
Permanent migrants under the Humanitarian Program (2000–2006)	1,620	0.3	7,614	0.2
Permanent migrants under	1,080	0.2	8,736	0.2

Joint Regional Health Needs Assessment | Multicultural communities

3. Multicultural communities' health needs

Outlined below are the key health needs identified by stakeholders, consumers in the Kitchen Table Discussions (KTD) and responses to the TALK ABOUT¹⁶ survey. More detail about the strengths and challenges associated with these health needs is provided in Section 4.

Access to affordable health care was identified as the key need of multicultural consumers by stakeholders participating in the consultations. Multicultural consumers participating in the KTD also mentioned several barriers they experienced in accessing health care, including:

- access to bulk billing and PBS
- long waiting times to access health care
- insufficient access to primary health outside of business hours
- difficulty in accessing health care close to where they live.

There are also not enough beds at the hospital. Sometimes we are waiting for seven hours in an emergency. Most of the time they do not have any translators. There was no translator and I translated for someone just about to go into surgery. (Consumer)

I have been in Emergency and there have been people who have walked out, they cannot wait any more. I also see a lot of people who end up being aggressive, but if they did not have to wait so long, they wouldn't be. (Consumer)

Usually, a sick person needs to see a doctor during the first or second day of illness, but booking an appointment with a doctor in Toowoomba takes 3 to 5 weeks. The patient either recovers or dies during this period. Going to the Emergency Department has become a nightmare because Toowoomba has one hospital, and if you happen to go to the Emergency Department you will sit in the waiting area for a period that may extend to nine hours. (Consumer)

It is painful when you find your child is sick but you are not able to see a doctor for a week. Booking an appointment with a doctor in Toowoomba has become difficult and takes a long time. (Consumer)

The theme of accessible and affordable health care underpins the more specific health needs below.

Mental health concerns

Good practice suggests that mental health services should be accessible, inclusive, safe and responsive to the unique and diverse needs of individuals, families and communities.¹⁷ Throughout the consultations, stakeholders consistently highlighted mental health concerns as the primary health issue. While relevant to multicultural communities generally, mental health concerns are of particular relevance to **refugee communities**.¹⁸ These mental health concerns included:

Joint Regional Health Needs Assessment | Multicultural communities

- Trauma:
 - complex trauma
 - psychosomatic pain (such as headaches and back pain)
 - psychosis
 - impact of undiagnosed mental health concerns on antisocial behaviour
 - concerns about families/loved ones overseas
 - mental health concerns specific to young people.
- Risk factors (other than trauma) for mental health concerns:
 - social isolation and lack of belonging
 - marginalisation and discrimination
 - lack of recognition of skills and qualifications, making meaningful employment, pride and supporting family more difficult
 - gambling, alcohol and other drugs.
- Stigma around disclosing and seeking mental health support.

Trauma concerns were raised as issues for multicultural communities generally (for example within the Pasifika community). The complex trauma associated with refugee communities was mentioned in particular. This included the Yazidi and African communities, and refugee youth.

Consumers in the KTD mentioned the following:

Well, I think there should be more rehab clinics. (Consumer)

Definitely needs work on mental health and believing the person does need that help. So many of us get turned away when we go up there and they are like 'you're ... not telling the truth.' And then you wind up dead. Something seriously going wrong, and you have been sent home with the wrong diagnosis. (Consumer)

Chronic health conditions

The prevention, early intervention and treatment of chronic conditions (for example, diabetes, heart, kidney, liver and asthma concerns) were also mentioned by stakeholders as key health needs of multicultural communities.

The literature suggests that multicultural communities in Australia experience a range of health concerns that vary from the general population.¹⁹ Initially, people from multicultural communities may have better physical health compared to their Australia-born counterparts (the healthy migrant effect). However, over time, multicultural communities may be exposed to risk factors due to changes in diet and lifestyle – such as increased consumption of high-energy takeaway foods and sedentary behaviours – leading to weight gain and obesity.

While not specific to the region (data was only available for Queensland overall²⁰), country of birth data illustrates that people born in particular countries have higher rates of some potentially preventable hospitalisations (PPH) stemming from chronic conditions, compared to people born in Australia. For example:

¹⁹ Khatri, R.B. and Assefa, Y. (2022). Access to health services among culturally and linguistically diverse populations in the Australian universal health care system: issues and challenges. BMC Public Health 22 (880). <https://doi.org/10.1186/s12889-022-13256-z>

²⁰ Queensland Health (2023). Exploring the Health of Culturally and Linguistically Diverse (CALD) Populations in Queensland: 2016–17 to 2019–20.

Joint Regional Health Needs Assessment | Multicultural communities

- people born in Syria (Middle East) were observed to have the highest rates of PPH stemming from chronic conditions such as congestive cardiac failure, diabetes, urinary tract infections and dental conditions
- people born in Sudan (North Africa) have the highest rates of PPH stemming from acute conditions, pelvic inflammatory disease, convulsions/epilepsy, and ear nose and throat conditions
- people born in Serbia (Southern and Eastern Europe) had the highest rates in chronic obstructive pulmonary disease (COPD), hypertension and gangrene.

Child developmental concerns among young people

Development or disability concerns among children and young people were noted within multicultural communities. For example:

- suspected brain injury not diagnosed or disclosed
- suspected intellectual disability not diagnosed or disclosed
- determining the difference between a physical and mental health concern among some populations
- relatively low awareness of and knowledge of child development.

Health system literacy

A need for better health system literacy was a key theme throughout the consultations – among both stakeholders and consumers. This included:

- not knowing where to attend for what issue (GP, hospital or elsewhere)
- not knowing how to make health appointments
- varying perspectives about what good GP care looks like (expectations about receiving medications at each GP visit)
- lack of understanding about private health insurance
- lack of access to resources in language
- for consumers, improved access to their health information.

Multicultural health consumers sought better access to their own health information:

Easy access to our health records through online portals, by ourselves, whenever we want. If we have our health records with us, we can access a second opinion wherever we want, even overseas. Otherwise, we need to pay for every visit to the GPs. (Consumer)

I agree, I think there should be a patient portal where we can access our own information and prescriptions. (Consumer)

Yes, I think a patient portal is very important. We cannot access our health records or our prescriptions, we get e-scripts or a refill. (Consumer)

I would like to ask them to make it easier, to allow access to personal records and prescriptions and basic results, so if you can't see your GP immediately at least you know your results or get your medications. (Consumer)

Also, I would ask doctors to make sure that they have access to reports like radiology. My doctor did not have that and I had to wait. (Consumer)

Joint Regional Health Needs Assessment | Multicultural communities

Preventative health

The key issues mentioned within preventative health included:

- Vaccinations (for example for influenza²¹ or COVID-19²²):
 - people born in Somalia (Sub-Saharan Africa) had the highest rates of all vaccine-preventable conditions, including vaccine-preventable influenza and pneumonia and other vaccine-preventable conditions, compared to the Australia-born population
 - recent Australian COVID-19 mortality data showed that over the course of the pandemic, those born overseas had a higher death rate when compared to those born in Australia.²³
- Sexual health (particularly for farm workers/seasonal workforce).

Service availability

Based on a desktop review of services available within the region, the greatest number and range of services available for multicultural and refugee communities are in Toowoomba and Ipswich. Please see Appendix 2. Multicultural service availability for a list of services.

The available services were categorised into:

- mental health
- health education
- service navigation
- psychosocial
- health assessments.

These services are shown on an interactive Google Map, with each of the above categories available as a toggle-on or off layer. Services in red and pink are youth specific.

As shown in Figure 2 and Figure 3, health services and wellbeing programs specifically designed to support the multicultural and refugee communities are clustered around Toowoomba and Ipswich, with more services available in Toowoomba as it is a Refugee Welcome Zone.

The Ethnic Communities Council of Queensland (ECCQ) Multicultural Advisory Service provides health education across the region, especially around healthy ageing (service zone not mapped).

Joint Regional Health Needs Assessment | Multicultural communities

Figure 2: Services for multicultural communities available in Toowoomba

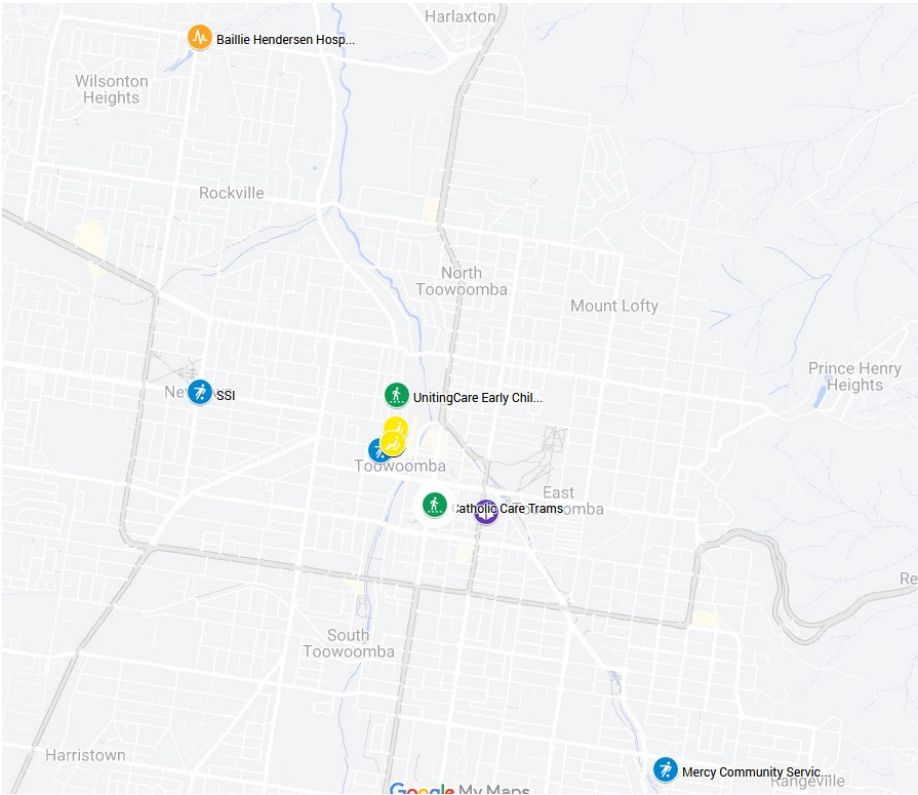

Figure 3: Services for multicultural communities available in Ipswich

Joint Regional Health Needs Assessment | Multicultural communities

Multicultural community service needs

Outlined below are the key service needs identified by stakeholders, the KTD with consumers, and the TALK ABOUT survey. More detail is provided in Section 4 about strengths and challenges associated with these service needs.

Equitable access to culturally safe and appropriate health care

Stakeholders reported a need for more **culturally safe spaces** where people from multicultural communities are comfortable attending. This is to ensure that people feel respected, safe, valued and understood when receiving health care sensitive to their gender, and receive care that is sensitive to their presenting health and social issues. It is also important that people know where they can receive health care and can access transport to attend the healthcare setting. The need for equitable access to culturally safe health care was echoed by consumers responding to the KTDs. Consumers noted the following:

Doctors to be culturally safe and knowledgeable about my background. (Consumer)

Non-judgmental and understanding my health needs. (Consumer)

Lack of written information available in specific languages. (Consumer)

*Having doctors with same cultural background for feeling safe and confident.
(Consumer)*

I would also prefer a woman but there are some things that I can't just share with anyone. It is very sensitive. I need someone who understands my culture. (Consumer)

Some people from my community don't feel comfortable being touched or removing their clothes for an x-ray and people don't understand that it's a cultural thing. It would be very helpful to have a female GP. It would be better if people are asked their preference about things. (Consumer)

Respectful care would mean a lot to me. Sometimes women need women to understand you and a man doesn't get what you are struggling with. I think the service is overall respectful. Most doctors know the Yazidi community now and doctors are starting to understand us. They are respectful of what we don't feel comfortable with and we really appreciate this. (Consumer)

For me, I think they are very respectful of me and my culture and what I feel comfortable with, what is appropriate for me. If I am respected, I feel so good, it makes me happy, and I feel safe. (Consumer)

Stakeholders also thought that **mainstream services** need to be more culturally safe and appropriate. That is, healthcare providers required more training to enhance their cultural awareness and sensitivity, enabling them to deliver care that is respectful of and tailored to the cultural backgrounds of their consumers. Specifically, there is a need for refugee ready general practices which can complete newly arrived refugee health checks particularly in West Moreton (Ipswich) area.

Joint Regional Health Needs Assessment | Multicultural communities

Cultural competency training²⁴ includes:

- awareness of one's own cultural worldview: healthcare providers are encouraged to reflect on their own cultural beliefs and biases and understand how these may affect their interactions with consumers
 - understanding the cultural context of the consumer: providers learn about different cultural norms, values and health beliefs that may influence a consumer's behaviour and attitudes towards health and health care
 - developing cross-cultural skills: training focuses on practical skills for effective communication and interaction with consumers from different cultural backgrounds, including the use of interpreters when necessary
 - addressing health disparities: cultural competency training often includes content on the social determinants of health and how they disproportionately affect certain populations, including multicultural populations
- trauma-informed approaches: trauma-informed care is based on the understanding that a significant number of people seeking health care have experienced trauma in their lives and that trauma may be a factor for people in distress, impacting their interactions with people and services. Trauma informed services are based on the following principles:²⁵
- safety – emotional as well as physical, e.g. is the environment welcoming?
 - trust – is the service sensitive to people's needs?
 - choice – does the service provide opportunity for choice?
 - collaboration – does the service communicate a sense of 'doing with' rather than 'doing to'?
 - empowerment – is empowering people a key focus?
 - respect for diversity – does the service respect diversity in all its forms?

Better access to translators who have health/mental health knowledge and skills

Stakeholders reported a need for better access to translators and interpreters, both during core hours and after hours. This includes translators who have sufficient knowledge of health and mental health as the language and concepts for these areas are complex. It is important too that the translators are not known to the consumer/client or from the same community to ensure privacy, confidentiality and cultural protocols are respected. These themes are echoed in the literature.

Consumers also reported a need for better access to interpreters or practitioners who shared their language or culture:

It would be very helpful for my family to have an interpreter. And people who understand the culture and do not judge us. It makes a big difference when someone understands you. Once my mum went to a general practitioner who was from my country and she felt very comfortable with her. (Consumer)

I think interpreting is very important, but they need to be face-to-face. Phone interpreters are not so good, you cannot explain how you feel. When the interpreter cannot see the patient, they can't understand their body language or how they are really feeling. The emotion is lost and it is very important. And sometimes the accent is

²⁴ Khatri, R.B. and Assefa, Y. (2022). Access to health services among culturally and linguistically diverse populations in the Australian universal health care system: issues and challenges. *BMC Public Health* 22(880). <https://doi.org/10.1186/s12889-022-13256-z>

²⁵ <https://blueknot.org.au>

Joint Regional Health Needs Assessment | Multicultural communities

different, so a phone interpreter does not understand, and they translate it wrong. (Consumer)

When the waiting time is too long and when there is no interpreter, it is very difficult. If I go to my appointment and there is no interpreter I will leave and not do it. It is too overwhelming and hard; too difficult. I do feel comfortable when I go there, but I want an interpreter every time. (Consumer)

When I do not get an interpreter, it makes me feel like I don't belong and I don't matter. I want people to know that it affects our mental health and we are already not okay. (Consumer)

Some interpreters don't have a good health vocabulary and there are lots of misunderstandings. I don't need an interpreter myself but for my family it is very important. When I am with my family, I translate for them. It takes a long time to get an interpreter. The more services that are available the better. A lot of people don't understand or speak English. (Consumer)

I did the same [translated] for my mum when she was going into surgery. It's not good. It's not good at all. I am worried about the mistakes that could happen when there are no translators. (Consumer)

A larger multicultural workforce

From the perspective of stakeholders and consumers, better access to a multicultural workforce includes:

- a more diverse workforce within mainstream services
- workers from multicultural communities or organisations.

Specific workforce needs reported included:

- health professionals to offer more mental health services (counsellors and psychologists), particularly for refugee communities
- maternal and child health nurses (midwives, antenatal care) generally, with a priority for the Pasifika community
- nurses working specifically with refugee populations, with Toowoomba and Ipswich being priorities
- access to GPs who use the specific language of the community member
- peer workers/community support workers who can facilitate connections.

Better access to health care in rural and remote communities

The region includes urban, rural and remote communities. Most people from multicultural communities live in Ipswich and Toowoomba. Much like for their non-multicultural neighbours, few services are available, other than satellite hospitals, in the more rural and remote regions.

Awareness of available health services

Stakeholders reported a lack of awareness of health services among multicultural communities and confusion around how to access these health services.

Joint Regional Health Needs Assessment | Multicultural communities

4. Strengths and challenges

What is working well

Community hubs (co-location and in-reach)

Community Hubs Australia (CHA) creates known and trusted places within the community, where people gather. Services can reach into these spaces and provide an array of supports relevant to the needs of each family. Their community hubs²⁶ are embedded in primary schools and connect families from diverse cultural backgrounds with the wider community.

They receive state and federal government funding. They are based on an evidence-based model²⁷ that aims to enhance community engagement, early childhood development, English literacy and vocational pathways. The hubs connect women and their young children with each other and their school through a variety of activities and with organisations that can provide health, education and settlement support. The community hubs are located in:

- Toowoomba:
 - Darling Heights State School
 - Harlaxton State School
 - Newtown State school
- Ipswich:
 - Fernbrooke State School
 - Kruger State School
 - Riverview State School
 - Springfield Lakes State School
 - Staines Memorial College.

Visit the [Community Hubs Australia website](#)

Community Centres (co-location and in-reach)

Community Centres provide a known and trusted place where people can gather.

For example, the Redbank Plains Community Centre²⁸ is managed by Multicultural Australia (MA) and funded by the Ipswich City Council and the Queensland State Government. It aims to provide a welcoming and inclusive place. The centre provides a range of services that aim to make a meaningful impact for the Redbank Plains community by creating opportunities, reducing social isolation and developing a sense of welcome and belonging.

Services and workers for multicultural communities

Health workers employed specifically to meet the needs of multicultural communities, or services that work specifically with multicultural communities, were perceived by stakeholders as invaluable. The services below were nominated by stakeholders:

- Settlement Services International (SSI)
- Mater Refugee Health

²⁶ www.communityhubs.org.au

²⁷ www.communityhubs.org.au/wp-content/uploads/2024/02/Executive-Summary-2023-SROI-National-Community-Hubs-Program.pdf

²⁸ www.multiculturalaustralia.org.au/centres/multicultural-services-redbank

Joint Regional Health Needs Assessment | Multicultural communities

- Multicultural workers
- QPASTT

Settlement Services International (SSI)

SSI provides the Settlement Engagement and Transition Support (SETS) program in Ipswich. The SETS program provides newly arrived people with advice, advocacy and assistance related to settlement for a period of up to 5 years. It also assists new and emerging community groups and organisations support their specific communities. This includes:

- child health program
- wellbeing occupational therapist
- refugee health nurse (in West Moreton).

Visit the [SSI website](#)

Mater Refugee Health

The Mater provides a range of health services for refugee communities, including:

- The Mater Refugee Complex Care Clinic (MRCCC), a primary care, psychiatry, and paediatric service for people from refugee and asylum seeker backgrounds. Established in 2002, MRCCC provides initiatives to improve the health and wellbeing of communities in south-east Queensland.
- The Mental Health Coordinator Program (MHCP), which focuses on improving health literacy. The team includes clinical nurses, a social worker and program staff who work in partnership with the consumer, their community GP and other health and community services. A pilot program is operating in Ipswich.
- The Refugee Health Network Queensland, established in 2016, facilitates collaboration and coordination amongst health and community services to provide more accessible and appropriate health services for people of refugee backgrounds.
- The Brisbane Refugee Health Advisory Group (known as the G11) includes Health Development Consultants who are all regarded as leaders in their respective communities, from South Sudan, Eritrea, Burundi, Rwanda, Liberia, Somalia, Iraq, Syria, Afghanistan and Burma. The group provides a mechanism through which health services can have access to the voice of refugee communities.
- Refugee Health Connect (RHC) is a partnership between Brisbane South PHN, Brisbane North PHN, MA, Mater Health Services and Metro South HHS. It provides one point of call for assistance with identifying appropriate primary health providers in the Brisbane South and Brisbane North regions. RHC refers to GPs in the community who provide health assessments in partnership with Mater Refugee Health Nurses who provide outreach support to the GP practices. RHC also provides information about ongoing care for all people from a refugee background.

Visit the [Mater Health website for information on refugee health](#)

Multicultural workers

- The Refugee Health Outreach Program (funded by the PHN and commissioned to be provided by MA and SSI) provides support and care coordination services to newly arrived refugees. Services include coordinating access for consumers to GP and allied health

Joint Regional Health Needs Assessment | Multicultural communities

services, a refugee health nurse and supporting general practice to conduct Refugee Health Assessments and improve health literacy.

- West Moreton Health Service has a Multicultural Mental Health Coordinator and a Multicultural Coordinator.

The Multicultural Mental Health Coordinator role focuses on:

- reducing service access barriers
- improving mental health literacy
- supporting service navigation
- supporting mental health workers and services to provide more culturally appropriate and safe mental health care for people from diverse backgrounds.

A recent project has involved identifying and mapping mental health professionals who speak another language, to assist referrals. This work also includes developing a referral pathways flow chart.

The Multicultural Coordinator role includes overseeing the Telephone Interpreter Service.

- The Pasifika Maternity and Child Health Hub (located in Logan, which is an area outside the region, but included here as an example of good practice) provides services to the Pasifika (Polynesia, Melanesia, and Micronesia) communities in Logan to support healthy live births. The clinic runs from Monday to Friday 9 am to 4 pm. Mothers are supported by the same midwife throughout her pregnancy, as well as by a community connector, and an onsite obstetrician (who attends the Centre every Tuesday).

Visit the [Pasifika Maternity and Child Health Clinic website](#)

QPASTT

Queensland Program of Assistance to Survivors of Torture and Trauma (QPASTT) (is a non-government, not-for-profit organisation with no political or religious affiliations that provides culturally responsive services to promote the health and wellbeing of people in Australia who have sought safety from persecution, torture and war related trauma. QPASTT can help people of all ages, no matter how or when they arrived in Australia. To assist children and young people under the age of 16 years, QPASTT needs to get the consent of their parent or guardian. QPASTT provides a range of services, including:

- counselling to support healing and recovery from refugee trauma
- youth work for trauma recovery, community engagement and development of the young person's potential
- group engagement
- community based healing
- community development work
- asylum seeker mental health and wellbeing assessment and support
- Third Queer Culture, a peer social group for LGBTQIA+ people from diverse backgrounds who have an experience of seeking safety in Australia.

QPASTT can provide face-to-face sessions in the office or in locations in Toowoomba and Ipswich. Teleconferencing may be available in other areas, as appropriate.

QPASTT also provides a range of resources for health professionals, service providers, community leaders and schools.

Joint Regional Health Needs Assessment | Multicultural communities

Visit the [QPASTT website](#)

Cultural support workers

Cultural support workers, with lived experience, can navigate the health system and link people from multicultural communities to the supports that are available. For example:

- the cultural support worker model in the Ipswich region (funded by MA) was considered valuable by stakeholders. The key benefit was described as linking community members with community organisations – service navigation. The cultural support workers assist with delivering culturally appropriate and responsive support, including:
 - assisting clients to link to essential services and with other people from their culture of origin and build social connections
 - delivering orientation activities, including an introduction to the local area, household safety and public transport
 - assisting with emergency and crisis support, if needed.

Collaboration between community leaders and partners

Collaboration between partners enables person-centred care and the provision of wrap-around services. Stakeholders provided some good examples of collaboration between partners and expressed interest in further collaboration with the PHN. Examples of collaboration include:

- coordinating care between health and other service providers, for example receiving referrals from GPs, which allows time to have a conversation with the referrer about the needs of the person being referred
- consultation with cultural communities about services/activities that meet their specific needs
- developing relationships with specific mainstream agencies or partners, for example, Range Allied Health, and multicultural specific agencies such as MA and the community hubs (mentioned above).

Provider networks

Provider networks assist with sharing knowledge and skills and connecting parts of the health system. Examples include:

- Multicultural advisory committees to LGAs such as the Toowoomba Regional Council, which build relationships and enable services to be shaped to meet the needs of regional LGAs
- Community Development Officers within Regional Councils
- The Southern Downs Regional Council Interagency Network which includes all community, health and allied health service providers, government agencies and non-government organisations (NGOs) either based in the Southern Downs or providing services to the Southern Downs community. School representatives within the Southern Downs region are also welcome to join. The network connects regularly to promote their services and facilitate information sharing.

Joint Regional Health Needs Assessment | Multicultural communities

Other multicultural services

Translating and Interpreter Services

The Translating and Interpreting Service (TIS National) is an interpreting service provided by the Department of Home Affairs for people with limited English language proficiency and for agencies and businesses that need to communicate with their non-English speaking clients.

Visit the [Translating and Interpreting Service \(TIS National\) website](#)

Queensland Government Translating and Interpreter Services

Queensland has a whole-of-government Standing Offer Arrangement (SOA) for translating and interpreter services that are available to all Queensland Government agencies and other eligible Queensland Government-funded service providers.

The following language service providers are accessible via SOA arrangements:

- [2M Language Services](#)
- [Deaf Connect](#)
- [Translationz](#)
- [Language Loop](#)
- [ONCALL Interpreters and Translators](#)

Multicultural Connect Line (1300 079 020)

Provided by the World Wellness Group, the Multicultural Connect Line is a free, Queensland-wide phone service providing support and information to find aid, assistance and mental health services for people from multicultural backgrounds. The phone service can be called Monday-Friday between 9 am and 4 pm. Outside those hours the National Home Doctor Service (13 74 25) is suggested.

Culture Care (accessed via Multicultural Connect)

Provided by the World Wellness Group, Culture Care provides support to carers from multicultural backgrounds supporting people with mental health concerns. Culture Care provides emotional and psychosocial support over the phone (Queensland-wide), or face-to-face (Brisbane area). The team works with multicultural peer support workers and interpreters to provide language, cultural support and lived experience expertise.

Any person from a multicultural background who provides support or cares for someone with a mental health condition is considered a carer.

Culture Care provides support to:

- carers from multicultural backgrounds supporting someone who is experiencing poor mental health (immediate or extended family members, friends, housemates, neighbours)
- community and faith leaders (the traditional family/carers role has been expanded to include community elders and faith leaders as they are key people in multicultural communities who individuals turn to for support)
- carers who may or may not receive a Carer Allowance/or pension from Centrelink

Joint Regional Health Needs Assessment | Multicultural communities

- any carer from a multicultural background regardless of their immigration/or visa status.

The program also facilitates group programs for social connection and education.

Queensland Transcultural Mental Health Centre

The Queensland Transcultural Mental Health Centre (QTMHC) is a state-wide service that provides an information, referral, resource and clinical consultation service. Services are provided free of charge. Services include:

- clinical consultation
- consumer and carer participation
- the state-wide Multicultural Mental Health Coordinator (MMHC) program
- the Mental Ill-Health Prevention and Early Intervention (MI-HPEI) program
- access to a resource library, multilingual resources and publications
- policy and service development
- education and training, access to information and statistics and useful links
- updates about what's on from QTMHC.

The service is available Monday-Friday 8.30 am to 4.30 pm on (07) 3317 1234.

Visit the [QTMHC website](#)

Witness to War

Witness to War is a free and confidential multilingual telephone phone service for people in Australia affected by overseas conflicts. It is offered by the Forum of Australian Services for Survivors of Torture and Trauma (FASSTT). Staffed by mental health practitioners and bicultural support workers, Witness to War offers community members incidental counselling, information about available support and connections to other local services. Witness to War staff can speak to callers in Arabic, Hebrew, Dari, Ukrainian and English and in other languages with an interpreter.

Witness to War operates from Monday to Friday across Australia. The available hours in Queensland include: 9 am to 6 pm, free call **1800 845 198**.

Visit the [Witness to War page on the FASSTT website](#)

Multicultural Resource Directory

The Queensland Multicultural Resource Directory lists organisations that offer information, advice, support and networking opportunities, including:

- multicultural media outlets and schools
- community, non-government and government organisations and agencies
- consuls
- migrant and refugee service organisations
- bilateral business associations
- interstate multicultural offices.

Joint Regional Health Needs Assessment | Multicultural communities

[A multicultural events calendar is also available.](#) Community groups and organisations can request to be included in the Directory

Queensland Health Guide to health care in Queensland

The *Guide to health care in Queensland* includes general information about the health system for those new to Australia. This information is available in languages other than English. Available for download here:

Access the [Guide to health care in Queensland](#)

You can also access [Health care in Queensland: A guide for Queensland humanitarian program arrivals \(PDF\)](#) on the Refugee Health Network website

Ethnic Communities Council of Queensland (ECCQ)

ECCQ is the peak body in Queensland for multicultural communities and provides support and advocacy for the needs, interests and contributions of multicultural communities in Queensland. Their role includes:

- working closely with all levels of government to influence key decisions impacting multicultural communities
- elevating the voices of vulnerable people through engagement networks for women and youth, as well as the Speak My Language multicultural disability podcast
- providing capacity building opportunities to multicultural community groups – from setting up associations through to support writing grant applications
- providing health programs to support multicultural communities to live well
- a dedicated network of bi-cultural health workers to focus on community education to improve their health outcomes
- work with the multicultural sector to strengthen services to reflect the needs of the community, as well as collaborate and partner on research and advocacy.

Visit the [Ethnic Communities Council of Queensland \(ECCQ\) website](#)

Multicultural Youth Queensland (MyQ)

MyQ works towards creating a socially cohesive community where multicultural young people can equitably realise their goals socially, culturally, economically and politically across Queensland. MyQ provides:

- policy and advocacy for multicultural young people, the only Queensland representative voice on multicultural youth issues
- training, advice, information, resources and other support to build and strengthen system, sector and organisational capacity and cultural responsiveness
- training on Youth Leadership to young people to enable them to learn new skills in leadership, project management, public speaking, storytelling, youth facilitation and teamwork.

Visit the [My Q website](#)

Joint Regional Health Needs Assessment | Multicultural communities

Services Australia Multicultural Service Officers

Services Australia (formerly Centrelink) Multicultural Service Officers work with multicultural community groups, staff and other government departments. They do this to:

- promote and improve access to Service Australia payments and services
- build relationships in the community and across government
- improve service delivery to culturally and linguistically diverse (CALD) people by understanding their needs
- provide support and assistance in complex cases
- help Service Australia staff to communicate with CALD people through language services
- raise awareness and competency of Service Australia staff in providing services to CALD people
- build and maintain relationships with internal stakeholders to raise the profile of multicultural services.

Services include:

- [information provided in multiple language](#) that can be read, heard or watched
- talking to someone in their language Monday to Friday from 8 am to 5 pm
- support with Centrelink payments and services, by calling the [multilingual phone service](#)
- support with Medicare by calling the [Medicare program line](#). An interpreter can be arranged for free
- support with Child Support by calling the [Child Support Enquiry line](#). An interpreter can be arranged for free.

Visit [the Services Australia website](#)

What could be better

According to the literature, there are a range of challenges and barriers to accessing health care in multicultural communities.^{29,30,31} Stakeholders and consumers also identified a range of challenges or barriers to accessing health care. Many of the barriers align with the social or cultural determinants of health and are outlined below. Consumers would prefer better access to affordable health care, with reduced wait times for both GPs and at Emergency Departments.

Reintroducing bulk billing for everyone again. (Consumer)

Make subsidised medical bills or deferred payment. (Consumer)

If health care is free, it would be helpful. Going to the GP costs at least \$30 per session out of pocket. (Consumer)

²⁹ Khatri, R.B. and Assefa, Y. (2022). Access to health services among culturally and linguistically diverse populations in the Australian universal health care system: issues and challenges. *BMC Public Health* 22(880). <https://doi.org/10.1186/s12889-022-13256-z>

Joint Regional Health Needs Assessment | Multicultural communities

Home visit doctors, after-hours care services, would help more with our out-of-pocket, or with Medicare. (Consumer)

PBS [Pharmaceutical Benefits Scheme] or generic medicine would be highly regarded for better health outcomes. All medicines should be included in the claimable list. (Consumer)

At least one medical centre in each suburb and one or two GPs should be available at the weekends. Have bookings on weekends too, as well as weekdays. (Consumer)

Appointing more GPs, specialists, build more hospitals, medical centres. (Consumer)

It would be easier to get the care we need if there was a bigger hospital. A bigger hospital will be a great step, because a larger facility will mean more employees and more patients that can be helped. (Consumer)

The health professionals who responded to the TALK ABOUT survey (n=38) ranked their ability to provide health care to meet the needs of multicultural communities. More people ranked themselves in the top half of the scale (n=20, 53%) than the bottom (n=18, 47%). They said that the primary factor affecting their ability to deliver health care to individuals from multicultural backgrounds was the shortage of resources to adequately support the unique care needs of multicultural communities (n=32, 91%).

Health professionals responding to the TALK ABOUT Survey suggested the following things would improve health care for people from multicultural backgrounds:

- affordable allied health and disability support services (62%, n=22)
- more transport services (62%, n=22)
- more culturally safe health services (59%, n=22).

Access to interpreters and language barriers

Stakeholders reported that there is often a lack of culturally appropriate and culturally safe health information available in languages other than English. This makes it difficult for people to understand their health concerns and need for medication or tests. It also makes it difficult for people to be aware of, understand and access the healthcare system.

Stakeholders also reported that:

- it can be difficult to access interpreters who have the specific language skills and the relevant health knowledge and understanding of health vocabulary to be effective in the health or mental health space
- interpreters may also experience a cultural conflict (for example, providing advice to an elder which may be inappropriate)
- it may be difficult (traumatic or triggering) for interpreters to provide translations in some instances
- privacy and confidentiality may also be a difficulty when using interpreters, as the interpreter may know the consumers and/or their family
- there is a lack of Kurdish Kurmanji interpreters in particular
- given the business model of GPs, not all GPs have the time and resources to access interpreters, provide cultural competency training and provide supporting resources in other languages.

Joint Regional Health Needs Assessment | Multicultural communities

For good practice on using interpreters in a GP setting visit the [Royal Australian College of General Practitioners \(RACGP\) website](#).

[Access the Queensland Health Working with Interpreters Guidelines.](#)

The Australian Institute of Interpreters and Translators provides [a standards framework and a range of other guidance documents](#) for working with interpreters.

More information can be found [About NAATI](#).

[The Australian Refugee Health Practice Guide is also helpful.](#)

Reducing fear of discrimination or racism

Concerns about experiencing discrimination or racism within the healthcare system can make people feel unsafe to seek health or mental health support. According to the literature, consumers and stakeholders, a general distrust of the health system, or past bad experience can be a barrier to accessing care.

Give respect to our cultural background. (Consumer)

Free from racism, discrimination, gender. (Consumer)

Sociocultural values

Some people from multicultural communities may hold cultural values or religious beliefs from their country of origin that may differ from or conflict with the health behaviours and practices in their local area. For example, some people may expect to receive a prescription when they visit a doctor, and without that health care may be considered poor. Other stakeholders report that some men may not want to wait to see a GP and that women may prefer a female GP. Some stakeholders also state that it is difficult to complete informed consent documents as the explanation of the risks can be distressing and complex.

Associated stigma and shame may prevent people from seeking help from healthcare services that may not align with their beliefs and practices. Within the context of mental health, people may not acknowledge psychological distress and seek help.

Access to appropriate digital health

People from multicultural communities may face difficulties using digital health platforms due to:

- poor quality internet
- low levels of technological and digital health literacy
- lack of available technology or data (cost)
- a lack of information that is culturally and linguistically appropriate.

We need telehealth at least in simple English rather than medical jargons with Australian slangs or else in our same languages. (Consumer)

Cultural competency in health services

Stakeholders and consumers reported that mainstream health services systems and the health workforce within these services may lack the cultural competency skills that can assist people from multicultural communities to feel safe and welcome when accessing health care.

Joint Regional Health Needs Assessment | Multicultural communities

More empathetic and understanding staff and doctors in the medical centres and in hospitals. (Consumer)

Respectful care means an individual is well looked after, creating that healthy environment regardless of any gender, religion or age factor. (Consumer)

Feel welcome when visiting the emergency department and not feel discriminated. (Consumer)

The biggest thing about respectful care is to be listened to. (Consumer)

Respectful care means to me to be cared for and have supportive interactions. For me, it is not being talked down for your health condition. (Consumer)

Understanding, comfortable and welcomed. (Consumer)

For a receptionist to be more respectful and accepting, look at me as a patient, not of my colour and biased services. (Consumer)

View the [Queensland Health's Multicultural Health – Guidelines to Practice](#)

A joined-up health system with more options in rural and remote areas

The health system is complex and fragmented. Stakeholders described Service integration and coordination challenges for everyone in the community when trying to access health care. This is compounded for people from multicultural backgrounds, when considering both English language and the learning of a new system in a new country. For example:

- There may be few primary healthcare services and support in rural areas. While local health services and satellite hospitals may provide good health care, there may be long GP wait times and limited options for bulk billing.
- People may become disconnected from services and supports when the five-year SETS is completed.

Social and cultural determinants of health

People from multicultural communities are described as experiencing multiple barriers to health care. These social or cultural determinants of health can mean that the health system is less inclusive of the needs of multicultural communities, which in turn may contribute to health inequities, reduces health status and less access to health care. Examples of these challenges (which may be experienced more broadly within the region) include:

- the cost of health care, for example lack of bulk billing options for medical appointments or psychiatrists, which may result in people attending hospital as an alternative
- difficulties experienced when approaching the end of 5-year support, as for some individuals the length of the settlement period may vary
- certain visas (for example temporary visas) may limit access to Medicare services (although people seeking asylum in Australia who are not eligible for Medicare can access public hospitals in Queensland for free, as set out in the [fees and charges for Healthcare Services](#).)
- people may not be aware of, or able to afford, private health insurance

Joint Regional Health Needs Assessment | Multicultural communities

- lack of transport to certain locations and at regular times, which makes it difficult for people to access health, social and community services
- lack of employment opportunities if skills from the country of origin are not recognised within Australia
- the cost of accommodation, which people may need to prioritise over health care
- the continued increase in the cost of living, which means people may need to prioritise other expenses over health care.

Consumers said:

I have asked everyone to bring my family members here, so we can help each other. So, we don't feel alone ... and that way our children could be together also ... If my family saw me, they would say how can you live here alone by yourself? And my children are getting worse every day. They always fight at home. They break my wall ... it is mental health related. Australia is a safe country but I'm still not feeling safe because I'm alone ... (Consumer)

Respectful care would be accessing support even when you are on a temporary visa. I was under a temporary visa when I came to Australia, so I couldn't access any benefits. I paid tax but didn't receive any services. Sometimes kids have dental issues and it's not covered under Medicare, then it's too expensive to fix. (Consumer)

I want them to get a carer for me. I have done all the paperwork with Centrelink and am still waiting. I have so much pain and I am retired now. I have mental health issues and back pain. I am a single woman with children. It is very hard to do everything on my own and my health makes it more difficult. I am on a disability pension ... I don't get any mental health support and I don't know how to. I see a lady from [mental health service] every two weeks. She helps me a bit, but I don't get any other support. (Consumer)

For more information [see the Australian Multicultural Health Collaborative](#)

Joint Regional Health Needs Assessment | Multicultural communities

5. Opportunities and priorities

Potential opportunities on which to focus are outlined below. Many of these opportunities are relevant to multicultural communities generally, and refugee health specifically.³²

Education with multicultural communities

This opportunity is relevant across the region, with a focus on the refugee populations in Ipswich and Toowoomba.

Stakeholders suggested several ways in which education about the healthcare system could be conducted to increase multicultural communities' knowledge and awareness of how to access health care, where to access health care and of particular health topics.

One change I would make today is for our community to learn more about how to look after ourselves and stay healthy in Australia. Then we would be able to avoid the hospital. (Consumer)

More information about my health needs. (Consumer)

Developing education resources and providing education to community leaders and community members was considered a priority by stakeholders.

Education sessions could be targeted at both:

- community leaders (who can then share information further)
- community members themselves.

The suggestions included **short educational videos in language** on topics such as:

- human and childhood development
- how to access a GP and the role of bulk billing and private health insurance
- referrals pathways
- screening and vaccination programs
- sexual health
- mental health and wellbeing (psychoeducation and the role of mental health services)
- virtual care and telehealth.

Educational videos were seen to be particularly helpful for the Yazidi community, who do are not generally literate in written Kurdish Kurmanji due to decades of cultural persecution and prohibitions on written text. It was also suggested that preparing videos and providing information sessions could be useful for leaders within the African community who can then share that with their communities. There are many African communities with a relatively small number of people and different languages. However, this approach could be appropriate for many multicultural communities.

Other suggestions included:

- health advertising to inform health system navigation
- provide information in multiple languages
- an online hub with links to services and a search engine

³² www.health.qld.gov.au/public-health/groups/multicultural/refugee-services/refugee-health-and-wellbeing-policy-and-action-plan

Joint Regional Health Needs Assessment | Multicultural communities

- Mental Health First Aid training for multicultural community leaders and refugee workers.

Join the Refugee Health Connect Partnership with Mater

This opportunity is most relevant to the refugee populations within Ipswich and Toowoomba.

Access to RHC could provide refugee communities with better access to health care (including mental health care). RHC is a partnership between Brisbane South PHN, Brisbane North PHN, MA and Mater Hospital Brisbane. It provides **one point of call for assistance with identifying appropriate primary health providers in the Brisbane South and Brisbane North regions**. RHC refers to GPs in the community who provide health assessments in partnership with Mater Refugee Nurses who work with the GP Practices. RHC also provides information about ongoing care for all people from a refugee background. This could be a valuable service for the PHN to invest in – both in Toowoomba and Ipswich. Perhaps an online component could help connect those in other areas of the PHN with the service.

More generally, information about good practice mental health can be found on [the Embrace Mental Health website](#).

Build cultural competency with collaborative partners

This opportunity is relevant across the region, with a focus on the refugee populations in Ipswich and Toowoomba.

Identify GPs and other health providers with an interest in refugee health, or an interest in working with multicultural communities. Ensure these providers have the necessary tools, training and resources around cultural competency and accessing translation services. This may include providing funding for people to obtain these skills. It was suggested that providing funding to enable GPs to spend time embedded within a multicultural service, and to provide longer appointments, would enable much better provision of primary health care to high priority, hard-to-reach multicultural communities.

Building cultural competency, inclusive of trauma informed approaches with collaborative partners – including expanding on the work of the PHN funded Refugee Health Officers – was considered a priority by stakeholders.

Identify university students and volunteers to assist new arrivals to navigate services and interactions, for example:

- Centrelink appointments
- visiting community centres
- connecting computers to printers
- everyday support
- accompanying people to healthcare appointments.

Joint Regional Health Needs Assessment | Multicultural communities

Warm handover at the end of the five-year SETS program

This opportunity most relevant to providers within the Toowoomba region, connecting with those in Ipswich.

Stakeholders spoke of the challenges that people in multicultural communities experience when the client reaches the end of their five-year settlement period or moves to a secondary settlement area. For example, clients may move from Toowoomba to Ipswich for a range of reasons, although often due to the cost of housing or access to employment. In these instances, people may lose their established support networks, may not receive further support, or may lose the trust that they have developed with a worker over time. Stakeholders report that some people become 'lost in the system', being difficult to locate to better connect with other supports. Better planning to ensure a smooth transition of clients from one provider to another could facilitate continuity of care and support for people. Some people move out of Toowoomba to communities such as Ipswich, Warwick and Chinchilla.

Enhance access to interpreters for consumers receiving primary health

This opportunity is relevant across the region.

Stakeholders and consumers have suggested there is a need to increase access to translation and interpreter services. This could include:

- Accessing translators with health knowledge in other states, such as Western Australia. The time difference would increase available hours and location in another state would increase privacy and confidentiality in most instances.
- Training people within the community as interpreters, however this may not address the privacy and cultural concerns.
- Upskilling multicultural people within the community to become interpreters.
- The ability to bulk bill the use of interpreters.

Enhancing access to interpreters was considered a priority across the region.

Develop community transport within the region

This opportunity is relevant across the region.

Transport was regularly mentioned as a barrier to accessing services and supports. There is an opportunity to explore the development of community transport with other providers, LGAs and state government. This could include transporting young people to sports fields where they can participate in healthy community-based activities and helping people to access appointments, services and supports.

Developing community transport options was considered a priority across the region.

Community connectors/Peer support workers

This opportunity is relevant across the region.

Growing the pool of community connectors and peer support workers will assist with supporting people from multicultural communities to connect with relevant services and supports.

Joint Regional Health Needs Assessment | Multicultural communities

Better Connection with HHS Multicultural Offices to map available health workers who speak a language other than English in the region

This opportunity is relevant across the region, building on the work of WMH and extending to DDH.

Build on the work conducted by the West Moreton Multicultural Mental Health Officer, which involves identifying and mapping mental health professionals (and other health professionals) who speak another language so people can be referred to them or linked to them via telehealth.

It should also be noted that the PHN curates information about local GPs who can speak languages other than English. As at July 2024, they hold records of over 160 GPs in the region who are able to speak a language other than English.

Increase access to mobile health services, telehealth and outreach workers

This opportunity is relevant to pockets of a high concentration of multicultural communities outside Toowoomba and Ipswich.

Provision of primary care to communities and groups who are not able to easily access care could potentially:

- prevent hospitalisations
- result in better general health, mental health and sexual health
- better screening (e.g. BreastScreen)
- increase immunisations.

This could be achieved by increasing access to any existing mobile units or develop a mobile health unit (GP, nurse, screening, and ideally dentist) that can:

- visit smaller towns
- visit farms (with invitation from the farm owners to provide better access to health care for people under the Pacific Island Labour Scheme)
- include an assessment station at a suitable service where GPs can check the blood pressure and heart rate of people in the community and consult remotely
- use telehealth to connect people to a doctor of their culture.

CONFIRMATION OF MINUTES

1. CONFIRMATION OF MINUTES OF THE LIBRARIES AND CUSTOMER SERVICES ADVISORY COMMITTEE NO. 2025(02) OF 8 JULY 2025

RECOMMENDATION

That the minutes of the Libraries and Customer Services Advisory Committee held on 8 July 2025 be confirmed.

2 SEPTEMBER 2025

LIBRARIES AND CUSTOMER SERVICES ADVISORY COMMITTEE NO. 2025(03)]

OFFICERS' REPORTS

2. IPSWICH LIBRARIES PROGRAMS AND SERVICES

This is a report concerning Library Programs and Services.

This report demonstrates how the delivery of Library Programs and Services aligns with the strategic priorities of the organisation, while also aiming to meet the requirements outlined in the Queensland Public Library Standards.

The report includes comprehensive data on program locations, the number of sessions delivered, attendance figures, and the operational expenditure allocation for the 2024 – 2025 financial year.

"The attachment/s to this report are confidential in accordance with section 254J(3)(g) of the *Local Government Regulation 2012*."

RECOMMENDATION

That the report be received and the contents noted.

3. NEXT MEETING

The next meeting is scheduled for Wednesday, 5 November 2025.

4. GENERAL DISCUSSION (within the purpose and scope of the committee)

The General Manager (Community, Cultural and Economic Development), Ben Pole, requested that councillors advise him of any items they wish to include on the agenda for the next committee meeting.

The Manager of Libraries and Customer Services, Samantha Chandler, advised the committee that at the 2025 Queensland Auscontact Excellence Awards, presented by the Australian Contact Centre Association, Ipswich City Council was a finalist in the Contact Centre of the Year and Council's Contact Centre Coordinator won the Contact Centre Manager of the year category. Councillor Jacob Madsen (Chairperson) requested that congratulations be formally extended to the team.

PROCEDURAL MOTIONS AND FORMAL MATTERS

The meeting commenced at 2.03 pm.

The meeting closed at 2.32 pm.

OFFICERS' REPORTS

2. CITY LIVEABILITY PROJECTS AND 22B DEVELOPMENT AT SPRINGFIELD

This is a report for discussion concerning City Liveability Projects and 22B Development at Springfield.

RECOMMENDATION

That the report and presentation be received and noted.

DISCUSSION:

The committee discussed the following matters:

City Liveability Projects

- Project overview and deliverables
- Current activation and tenured user groups
- Activation in 2028
- The unintended consequences of the City Liveability projects

Acting Mayor Nicole Jonic left the meeting at 3.12 pm and returned at 3.13 pm.

Councillor Andrew Antoniolli left the meeting at 3.48 pm.

ACTION:

The Community and Sport Manager to:

- **Finalise scope of works for Tenure Review and engage external consultant.**
- **Draft a hierarchy of use framework for sporting asset use to help inform current and future asset allocation and infrastructure planning.**
- **Develop a high-level communication plan in regards to the intended tenure review and Hierarchy of Use framework.**
- **In parallel, review current tenure operations and prepare a presentation for Councillors at future Sport and Recreation Advisory committee meeting.**

3. NEXT MEETING

The next meeting is scheduled for Wednesday, 5 November 2025.

4. GENERAL DISCUSSION (within the purpose and scope of the committee)
