EXTERNAL ATTENDANCE: Daniel Roberts (Leader - Hydrogen Energy Systems Future Science Platform CSIRO), Dr Andrea Walton (Team Leader - Resources and Communities Team - Social Science Research CSIRO)

1. NEW IPSWICH PLANNING SCHEME - INTRODUCTION AND DISCUSSION ON INDUSTRIAL LAND NEEDS ANALYSIS

In response to the continuing unprecedented growth in South East Queensland and the Queensland Government's introduction of new planning legislation, State Planning Policy and South East Queensland Regional Plan, Council resolved to prepare a new planning scheme in accordance with the *Planning Act 2016*.

Further to the Councillor briefing session in April 2020, this briefing note provides an update regarding the stages and anticipated timeline for preparation of the new Ipswich planning scheme and begins the first of a series of discussions regarding key strategic policy issues to manage future growth and development with its focus on industrial and employment land needs analysis.

The supporting documentation in relation to this matter is confidential as it relates to discussions and decisions in respect of planning scheme matters.

2. WASTE TECHNOLOGIES

The presentation and attached papers are a high level summary of waste management and an introduction to a range of various aspects of waste technologies and / or processes.

The discussion will be broken into a summary of:

- Waste Management
- Waste Hierarchy
- Material Recovery Facilities (MRF)
- Organic Processing
- Waste to Energy (WtE)
- Eco Parks

It is important to note that this briefing is not designed to be a comprehensive list or an endorsement of one technology or process over another, and the information provided has been given to provide context for future discussions.

The supporting information in relation to this matter is confidential as it refers to specific locations.

3. PRINCIPAL CYCLE NETWORK

This is a briefing concerning the Principal Cycle Network in Ipswich.

The South East Queensland (SEQ) Principal Cycle Network Plan (PCNP), developed by the state in consultation with local governments across the region, provides the guide for planning and provision of cycling infrastructure.

The Queensland Department of Transport and Main Roads (TMR) provides grant funding for cycling infrastructure which aligns with the PCNP. Ipswich City Council (ICC) has been successful in accessing these grants to build key bikeways across our local government area (LGA).

Continued delivery of connected and safe cycling infrastructure will be important for the community and will assist in achieving cycling mode share targets set in iGO.

Attachments

1. Cycle Network Map 
2. Presentation on Principal Cycle Network 
3. Ipswich Commuter Bikeway Network 

4. CSIRO PRESENTATION

Presentation by Mr Daniel Roberts (Leader, Hydrogen Energy Systems Future Science Platform, CSIRO) providing information to Council on Waste to Energy.

5. CHAMPIONS WAY, WILLOWBANK - TRUNCATION - QUEENSLAND RACEWAY

Council approved a development application over Lot 25 on RP217490 that was subject to multiple road upgrades along Champions Way and Paynes Road, Willowbank. The road upgrades were required to accommodate the increased levels of traffic caused by the development and linkage to major transport routes.

This required road widening on some corners of Champions Way and Paynes Road which impacted on three council owned properties. Council provided landowner consent with the development application to allow the road widening to occur. One of the road widenings impacts on the Queensland Raceway leasehold land described as Lot 11 on SP108209.

The supporting information in relation to this matter is confidential due to the matter involving starting or defending legal proceedings involving the local government.

PROCEDURAL MOTIONS AND FORMAL MATTERS

The meeting commenced at 10.40 am.

The meeting closed at 4.30 pm.
