## **ICT Strategy Progress Report**

| Details         | The Information, Communication and Technolog (ICT) Strategy 2019-2024 has a roadmap/workpla  | n Oversight                  | ICT Steering<br>Committee |
|-----------------|--|------------------------------|---------------------------|
|                 | addressing 26 individual initiatives to be delivere over 4 years.  | d                            |                           |
| Project Manager | Chief Information Officer  | Reporting Period             | January to March 2022     |
| Overall Health  | Council has just passed the half-way point of the ICT Strategy. To provide an update on progress against the Strategy, a mid-point report card was developed and presented to the ICT Steering Committee in December 2021 (attached). The report shows positive progress has been achieved in Horizon 2 (2021-22) with several key initiatives already delivered and many in progress. Planning for Horizon 3 (2022-23) initiatives has commenced in line with Council's budget process, along with the ability to deliver the broader Organisation initiatives that require ICT input.  |                              |                           |
|                 | Positive progress has been achieved across the ICT Governance Initiatives, with the focus on continuing to mature the newer governance functions. This uplift has continued into Quarter 3, particularly in relation to risk and issue management. The ICT Business Case for Change (ICT Operating Model) project has been implemented, including some key functional activities realigned to other areas of Council which are now being operationalised into business-as-usual, the project closure report was presented and endorsed by the ICT Steering Committee on 17 February 2022.  |                              |                           |
|                 | As part of the major transformation program, the delivery of the migration of Council's ICT Infrastructure and data to a hybrid cloud environment was completed successfully in Quarter 2. In Quarter 3, the implementation of a Disaster Recovery (DR) solution has been implemented, with the test plans developed. Initial testing (small sample) has proven successful. The DR capability has been aligned to Council's approved Business Continuity Plan (BCP), which identifies Council's core systems for recovery. The remainder of the environment has disaster recovery capability. The testing for the DR (broader sample) is to be completed in Quarter 4. |                              |                           |
|                 | The DMZ re-design and migration activity is near penetration test will then also be scheduled for ( and highlight if there are any potential vulnerabi currently underway as part of the project closure   | Quarter 4, to test the secur | ity of the environment,   |
|                 | The optimisation of the new hybrid cloud environment will continue into Quarter 4. This activity is addressing the right-sizing of the infrastructure, the application lifecycle plan, particularly for older applications that need to remain on VMWare and not compatible with AWS Native, and working closely with the Information Management Unit to ensure the data retention policies are applied correctly.   |                              |                           |
| lk a se         | luitinti   | Duoquosa th                  | is Davied                 |

| Item           | Initiative                                    | Progress this Period  |
|----------------|---|---|
| ICT Governance | Rebuild ICT Governance and Controls Function  | The initial forming phase of this team and activities is now complete. ICT Governance controls have been designed and implemented, with the capability now able to support further maturing and improvements to the application of controls and integration between the governance layers both internal and external to the Branch. |
|                | Digital / Smart City / ICT Operating<br>Model | The focus of the Digital / Smart City Strategy priority has changed, with other focus areas taking a higher priority at this time. Further development in this area is currently on hold.   |
|                | Information Management Operating Model        | In Quarter 2, the Information Management Unit<br>(IMU) identified ICT as responsible for delivering<br>advice and relevant governance documents for   |

|                   |                                     |   | several key domains and sub-domains within the   |
|-------------------|-------------------------------------|---|--|
|                   |                                     |   | Information Management Strategic Plan 2022-  |
|                   |                                     |   | <i>2026</i> .  |
|                   |                                     | • | The domains include:   |
|                   |                                     |   | <ul> <li>Information Asset Management</li> </ul>   |
|                   |                                     |   | <ul> <li>Data Management</li> </ul>  |
|                   |                                     |   | <ul> <li>Information Security</li> </ul>   |
|                   |                                     | • | The required documentation is expected to be   |
|                   |                                     |   | delivered in alignment with the IMU's roadmap.   |
|                   |                                     |   | This continues to be relevant for Quarter 3 and  |
|                   |                                     |   | will continue into Quarter 4.  |
|                   | ICT Directives Overhaul             | • | The ICT Policy was reviewed in Quarter 2 and   |
|                   |                                     |   | endorsed by the Executive Leadership Team in   |
|                   |                                     |   | December 2021. Before this can proceed to be   |
|                   |                                     |   | endorsed by Council, the proposed ICT Policy   |
|                   |                                     |   | should be confirmed as remaining consistent  |
|                   |                                     |   | with the Code of Conduct applicable to   |
|                   |                                     |   | Councillors in Queensland through relevant   |
|                   |                                     |   | stakeholder engagement, which should occur in  |
|                   |                                     |   | Quarter 4.   |
|                   |                                     | • | The changes made to the ICT Policy:  |
|                   |                                     |   | <ul> <li>improve alignment with the ICT Strategy</li> </ul>                                  |
|                   |                                     |   | Principles,  |
|                   |                                     |   | <ul> <li>strengthen commitment to cyber and digital</li> </ul>                               |
|                   |                                     |   | security controls, and   |
|                   |                                     |   | <ul> <li>address proposals arising from Internal and</li> </ul>                              |
|                   |                                     |   | External audits.   |
|                   |                                     | • | As part of the Information Security Management   |
|                   |                                     |   | System (ISMS) Project, an overhaul of the  |
|                   |                                     |   | Information Security Policy and Directives will now commence in Quarter 4. This will be      |
|                   |                                     |   | •  |
|                   |                                     |   | informed through the engagement for the ISMS   |
|                   |                                     |   | Strategy and Framework that is currently   |
|                   |                                     |   | underway.  |
|                   |                                     | • | The review of the remaining ICT procedures to be addressed in accordance with Transformation |
|                   |                                     |   | Project 9 Policies and Procedures is continuing in   |
|                   |                                     |   | consultation with Council staff.   |
|                   | Oracle Enterprise Business Solution | • | Oracle infrastructure virtualisation and the   |
|                   | End of Life Risk Management Plan    |   | transition to AWS (including Disaster Recovery   |
|                   | (BP01)                              |   | implementation) is underway, scheduled for   |
|                   |                                     |   | completion in Quarter 4. This was delayed due  |
|                   |                                     |   | to some challenges with obtaining Oracle EBS   |
|                   |                                     |   | resources in the market. The infrastructure has  |
|                   |                                     |   | been tested and when a resource is available,  |
|                   |                                     |   | the migration will be completed. While this  |
| Business Platform |                                     |   | won't mitigate the End of Life of the  |
|                   |                                     |   | environment, it will implement a DR capability   |
|                   |                                     |   | not previously available.  |
|                   |                                     | • | Post-implementation options available for  |
|                   |                                     |   | ongoing support and maintenance are currently  |
|                   |                                     |   | under review in line with the timelines of   |
|                   |                                     |   | delivering iVolve.   |
|                   | Customer Engagement System (CES)    | • | Work has commenced on implementation of the  |
|                   | and Pathway                         |   | Customer Experience Strategy, including a  |
|                   |                                     |   | number of initiatives to improve the Customer  |
|                   |                                     |   | experience. To further enable this, an upgrade   |
|                   |                                     |   | of Pathway and implementation of e-Pathway in  |
|                   |                                     |   | Quarter 4, has been scheduled.   |
|                   |                                     |   |  |

|                           |   | Ongoing reviews into support options for CES and Pathway continue to ensure the best possible coverage to support optimal outcomes for the business and its customer.  |
|---------------------------|---|--|

|   | due to unforeseen events impacting resourcing   |
|---|---|
|   | in January/February.  |
|   | The ISMS project will inform how ICT security is    The ISMS project will inform how ICT security is              |
| 5   | delivered for ICC.  |
| Firewalls, Checkpoint and Bluecoat                                  | All implementation and upgrades complete.   |
| Upgrade   | DMZ environment redesigned, improving   |
|   | security further for Council.   |
|   | Palo Alto virtualised into AWS.   |
|   | Ongoing ICT security management is currently  |
|   | under review to ensure cyber security and   |
|   | infrastructure security managed as per best   |
|   | practices.  |
|   | This will be actioned in Quarter 4, as the  |
|   | contract expires in Quarter 1 22/23.  |
| Outsourcing Model & Service Partner                                 | Phase 1 – Complete.   |
| Optimisation (ITSM02)   | Phase 2 – Complete (as per original project   |
|   | scope)  |
|   | Note: Oracle infrastructure transition is a   |
|   | variation to Phase 2 and was out of scope. Was  |
|   | brought into the project to deliver a DR for  |
|   | Councils ERP. This is expected to be completed  |
|   | by the end of April.  |
| Identity Management (ITSM04)  | This initiative and funding has been  |
|   | amalgamated with Disaster Recovery (DR)   |
|   | Enablement (ITSM06).  |
|   | This initiative has been addressed through the  |
|   | design and delivery of the AWS hybrid cloud   |
|   | environment from an infrastructure perspective,   |
|   | and will be further addressed by some of the  |
|   | controls that come from the ISMS project.   |
| Capacity Management & Application                                   | Initiative will be delivered through the  |
| Performance Monitoring  | Optimisation of the AWS hybrid cloud  |
|   | environment.  |
|   | Monitoring tools and capacity management tools  |
|   | have been applied to the environment, which   |
|   | provides a proactive management function from   |
|   | an infrastructure, and application performance  |
|   | perspective.  |
|   | These tools also deliver a financial management,  forward projection, and reporting complicity.                   |
| Disaster Pesayony (DR) Enghlament                                   | forward projection, and reporting capability.   |
| Disaster Recovery (DR) Enablement (ITSM06) and Cloud Needs Analysis | Transition-in of services is underway; for  systems already transitioned. Disaster Recovery.                      |
| and Roadmap (ITSM08)  | systems already transitioned, Disaster Recovery   |
| and Nodulitap (11314100)  | <ul> <li>services have been enabled – Completed.</li> <li>Once full transition is complete, and Oracle</li> </ul> |
|   | Once full transition is complete, and Oracle     infrastructure has transitioned, review of                       |
|   | Disaster Recovery implementation will take  |
|   | place to refine the DR capability. – <b>Pending final</b>   |
|   | Oracle migration to be completed in April   |
|   | (delayed due to resource availability issues).  |
|   | Ongoing roadmap will be informed through the  |
|   | optimisation of the AWS hybrid environment,   |
|   | and the outcome of the iVolve procurement   |
|   | process.  |
| Desktop Virtualisation / DaaS                                       | This initiative and funding has been  |
| (ITSM07)  | amalgamated with Disaster Recovery (DR)   |
| <u> </u>  | Enablement (ITSM06) due to common design  |
|   | dependencies.   |
|   | Needs analysis to be undertaken in Quarter 4.   |
|   |   |

|                | Cloud Needs Analysis & Roadmap (ITSM08)  | <ul> <li>This initiative and funding has been amalgamated with Disaster Recovery (DR) Enablement (ITSM06).</li> <li>Ongoing roadmap will be informed through the optimisation of the AWS hybrid environment, and the outcome of the iVolve procurement process.</li> </ul>   |
